

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

## An EXAMINATION of Father BOUGEANT's Philosophical Amusement, &c.

MADAM,

DARE fay you have made many a merry Reflection upon the good Company and Conversation we lately enjoyed at B----ton: for my own part, I can never think of it without laughing. Methinks I hear my little Doctor pouring forth all his Rhetoric and Logic upon an abstruse Question, which I was sure he had not Capacity enough to understand. I fee, and hear, and admire his modest Assurance, uncapable of Contradiction, affirming without Proof, and concluding without Premifes, that all the Animal Functions and Operations of

of the Brute-Creation (which different Philofophers had afcribed to different Caufes, fuch as Mechanism, Instinct, Substantial Forms, &c.) were entirely owing to the Operation of evil Spirits, who are the moving Principle in every one of them. As this Thought was quite new to me, and perfectly opposite to all the Sentiments I had ever entertained upon that Queftion, I could not for my life imagine, where he had pick'd up this new Philosophy, which shad almost frighted fome of the Company out of their Senfes .--- I shall never forget the puzzled afflicted Face of the honeft Juffice, who, tho' a very good Protestant, and in all other refpects of blamelefs Life and Conversation, had Apent to many Years in following a Pack of Devils, which he had innocently mistaken for a Pack of harmless Beagles .- But the whimfical Distresses of the poor Ladies, gave me no fmall Diversion. Sweet Mifs Jenny, who has lavish'd away more Kiffes upon her favourite -Cat, than the would beftow upon the beft Man in the Parish, felt some computction within herfelf, that the had been wantonly, and almost -maliciously, throwing away those Carefles upon an evil Spirit, which many a good Christian would have been glad of. Dear Mils Harriot had the fame regret for her beloved Monkey, and poor Dolly for her Parrot; and refolved, oneand-all, never to hold commerce or correspondence with evil Spirits for the future, in whatever amiable Shape or Figure they might appear; which, I apprehended, could end in nothing leís

less than an intire deftruction of all the favourite Domefticks of the Family; whilft you, with a chearful composure of Mind and Countenance, infeparable from good Nature and good Senfe; fat finiling at the empty Harangue of the Orator, and the fantaftical Sufferings of the Audience.

Well ! home I went, full of this abfurd, unphilosophical Scheme, wondering how my learned Friend, who, with very moderate Talents, affects to be thought a very great Scholar, and profound Philosopher, could ever fall into this uncommon way of thinking. But as I chanced a few days after to strole into a Bookseller's Shop, I fpyed a little Pamphlet lying upon the Counter, entitled, A Philosophical Amusement; concerning the Language of Birds and Beasts. Written originally in French by Father Bougeant, a learned Jefuit, &c. I quickly perceived where my learned Friend had pick'd up his new Philosophy, from what Fountain all this profound Erudition was drawn. The honest Man has a very preposterous Ambition to be famous; and as he is conficious that he has no change to attain any degree of Distinction from the proper and regular use of his intellectual Faculties, he therefore attempts a nearer cut to Fame, by engaging the Attention of the Unlearned to fomething that has a new and marvellous Appearance : This has given him an itch after Novelty, and an affection for uncommon Notions, more than common Senfe. No wonder, therefore, he was immediately ftruck B<sup>2</sup> with with this furprizing Sentiment, which he refolved to put off at the next Tea-table for his own, affuring himfelf, that neither the Ladies, nor myfelf, (whofe Obscurity he heartily despises) should ever find him out, but admire him for a most profound Philosopher. I took my Pamphlet home with me, and read it over and over, with the greatest Care and Candour; and upon the whole must needs fay, that I should never have suspected the Author (if he had not told us to himfelf) to be a fejuit, much lefs a Famous Jesuit. He has done no credit to his Order; the Gentlemen of that Society owe him but little Thanks; they generally acquit themfelves much better upon any Subject they un-He has treated a noble Subject loofedertake. ly and fuperficially, to fay no worfe; for I might add, idly and profanely; and had I been his proper Superiour, I should have changed his Confinement at La Fleche, for a more proper Habitation at Moorfields.

But this (fay you) is libelling without Proof, condemning at random : Let us come to Particulars; make good your Charge, fhew us, if you can, the Defects of his Scheme, and try if you can ftrike us out a better.

With all my heart, Madam. But before I proceed to a more particular Examination of his Scheme, I muft freely acknowledge, that there are a great many just and sprightly things scattered up and down through his whole Performance; but favouring more of the vivacity of the Frenchman, than the piety and solidity of a Christian

ftian Philosopher. He justly and smartly ridicules the unintelligible trumpery of Mechanism, Inftinct, Substantial Forms, and what not of the Aristotelian and Cartesian Philosophy, which, like occult qualities, are hard Words without a Meaning, intended only as a thin difguife for Ignorance and Affectation : But what has he advanced in the room of them? Why, fomething equally abfurd, but not equally innocent; fomething flocking to a Philosopher, and offensive to a Christian, in direct contradiction to Reason and Revelation, as I shall endeavour to make appear. Nor is he less offensive in point of Delicacy, his Ideas and Sentiments are often to low, his Images to indecent, his Expressions to coarte, as could hardly be expected from a polite Frenchman, and an Ecclefiaftic to a fine Lady, whom, at the fame time, he feems to confider as a Perfon of Difcernment and Diffinction. Let us now follow him his own way. His first Chapter is

### Of the Understanding of Brutes.

He begins with this Queftion; Have Brutes any Understanding? I am convinced (fays he) that you will not fo much as befitate upon this Question: farely prefuming she would answer in the Affirmative, and as I dare venture to affirm that his fair Correspondent had not a better Understanding than mine, I will venture to presume the fame for you. An Understanding they certainly have of such a kind or degree, at least as is sufficient for their state and rank in the universal

univerfal System, and the several duties and offices for which they were intended by their Creator. Lefs than this I think cannot be faid, and who prefumes to fay more? Though I have known many an honeft Fellow that made a good figure in his Neighbourhood, who yet has hardly discovered more Reason, a better Underflanding, or half fo much Virtue as the Beaft he rode on. Take any Man of a plain, natural good Understanding without the prejudices of Philosophy, and propose the lame Question to him: I dare fay he would stare at you, and think you were bantering him; or if he thought you were in earnest, he would not to much as demur upon it. In fhort, however we may affect to puzzle ourfelves or others with learned Objections proceeding from downright Ignorance, we all own it, we prefume upon it, as a first Principle, we reason upon it, and act agreeably, as we make it an unerring Rule to direct us in the Treatment and Management of our domeftick Animals; this it is that guides us in the education of our Dogs and Horfes, to train them up by Correction and Discipline to the feveral Offices for which they are intended, and the Services which we expect to receive from them. This it is that directs us to carefs and reward them when they do well, and to correct and punish them, when they are vicious and difobedient. Did we confider them as meer Machines, as Creatures that had no Senfe, Underftanding, or Reflection; this Conduct would be as abfurd and ridiculous, as it would be to carefs

carefs and reward your Clock or your Watch for going well, or correct and punish them with a Whip or Cudgel for going wrong. On the other hand, we discover in Brutes plain and evident marks of Senfe and Understanding. They are fenfible what we do to them, and what they do to us. When for instance I see a Dog hastening to me when I call him, carefs me when I ftroke him, tremble when I rate him, run away from me when I beat him : nay, further, when I fee him reflecting and reafoning upon my Conduct towards him, I must conclude he is acted by fome higher Principle than meer Mechanism. Be pleased, Madam, to try this Experiment with your beloved Veny, (though upon fecond Thoughts he has been too much and too long a Favourite to apprehend any danger from your Hands,) or call any other Dog of the Family, whose Hunger may make him leap at a good Morfel, fhew him a Piece of Meat -in your Left Hand, and hide your Right Hand behind you, and fee how he will behave; efpecially, if he knows he has been guilty of a Fault, or been rated or punished for some Misdemeanour. He will either not come near you at all, unless urged by the violence of his Hunger, or approach you with the utmost Diffidence and Caution: for thus I hear him reasoning with himfelf; Surely, this is not the Hand that used to feed me, and why is that other Hand hid from me? That Hand, from which I have received many a fore Stripe, when I have offended, has now, I fear, some secret Vengeance, some Whip, or Cudgel

Cudgel in store for me, if I get within the reach of it; I will therefore prefer the Dog's Portion of Hunger and Ease, before Lashes and Stripes, and broken Bones. Ay! and he is much in the right, he reafons well, and discovers more Sense and better Logic than many a stupid Puppy with two Legs, who lives at random, who purfues every appearance of Pleafure, gratifies every Appetite, fubmits to every demand of Luft or Fancy, without Thought or Reflection, and rufhes with his Eyes open into certain Difeafes, Beggary and Damnation. Now then if the Senfes and Perceptions of Brutes be fo quick and lively, if from those Perceptions they never fail to draw just and rational Conclusions, and to make a practical Use of them for the preventing Pain, or procuring Pleasure, if by the different Motions and Gestures of their Bodies, or Sound of their Voice, they express their different Sentiments of Joy and Sadness, of Pain or Pleasure, of Fear and Defire, of Love or Hatred; I cannot help concluding from thence, that they have in them fome Principle of Knowledge and Sentiment, be it what it will. Now, were all the Philofophers in the world to affert and maintain the Cartefian Opinion of their being Machines, there is fome ftrong inward Conviction in every fenfible unprejudiced Mind that gives them the lye, tho' we were not able to confute their Affertion, nor defend our own; and furely nothing but the Vanity of a Frenchman could ever expect that fo absurd a Scheme could pass upon a learned World for found Reafon and true Philofophy. For

For my own part, I could as foon expect to fee Gallantries between a couple of amorous Clocks or Watches, or a Battle betwixt two quarrelfome Windmills.

The Notion of Instinct, though not fo palpably abfurd, is equally obfcure, unneceffary, and useless for all the great ends and purposes which it is intended to ferve. They who use it, do not pretend to define it, to fhew us its real Nature, or wherein it confifts, they feem only to fpeak of it as a blind Impetus, and unknown Impulse; a kind of Mechanical Neceffity, by which we are in a manner compelled to perform fuch and fuch Actions, without being able to know or explain the Reafons for fo doing. By this, they pretend to account for many wonderful Operations and Effects in the almost infinite Variety of Species through the Brute-Creation, fuch as, for inftance, all forts of Birds building their Nefts in exact uniformity of Model and with the fame Materials, all the various Methods of Cure that both Birds and Beafts have recourse to when they are any ways indifposed or wounded; this it is, they fay, that teaches the Sparrows to purge themfelves with Spiders and other Infects; this teaches Birds to fwallow Gravel to facilitate their Digestion; this teaches the Dog with a furfeited Stomach to run to a particular kind of Grass to procure a Vomit; to this we owe all the excellent and wonderful Operations to be found among Beafts and Birds, Reptiles and Infects; many of which feem to exceed the higheft

higheft Improvements of human Reafon and Invention. But why must all this be owing to Inftinct? Since we cannot refuse them a knowing Faculty, why fhould we give them a needless Instinct? These wonderful Operations may be, for ought we know, the fimple Effects of their Understanding : and fince it is folely in confequence of a knowing Faculty, that Man performs the fame Operations, why should not the fame Principle also rule in the Brutes? And where would be the Herefy of believing or affirming, that those Actions which Brutes are supposed to perform by meer Instinct, are performed in confequence of their Understandings, with Understanding and Reafon? Is fuch a thing impoffible? Does either Reafon or Revelation forbid it? Are they not equally poffible to their Omnipotent Creator? And can any reasonable Doubt be made, whether they were not endued with every Perfection that their Rank in the Scale of Beings required ? And would it not be a great Imperfection to want the means of knowing and procuring whatever was requifite in the common Order of Nature, for the Prefervation of the Individuals and the Propagation of the Species? And fince it cannot be denied that every Species of Beings have that power, I fee nothing abfurd or unphilosophical in supposing, that the All-wife and Omnipotent Author of Nature has given each of them fuch Faculties as are proportionable to their Wants and Capacities, and the part they fill in the universal System. Is there either Abfurdity or Herefy in fuppoling, that the fame

fame infinite Power that could form the Body of the most minute Infect, with such exquisite Proportion and Beauty, could at the fame time, with the fame eafe, provide a proper Inhabitant to animate and govern it, and answer all the purposes of its Creation? He that can think otherwife, must have been either a very ignorant or a very indolent Observer of Nature. The Scriptures directly call this Knowledge by the name of Wildom, Prov. xxx. 24. There be four Things that are little upon Earth, but they are exceeding wife. The Ants are a People not strong, yet they prepare their Meat in the Summer. The Conies are but a feeble Folk, yet they make their Houses in the Rocks. The Locusts have no King, yet go they forth all of them by Bands. The Spider taketh hold with her Hands, and is in King's Palaces. Holy Job supposes the same thing, that the whole Brute-Creation act by Wifdom and Understanding, of fuch a Kind and Degree as is proper for their State and Condition in the Scale of Beings. Thus Cb. xxxix. 13, 14, 15, 16, 17. speaking of the Oftrub, he observes, that she leaves her Eggs in the Earth, and warms them in the Dust, and forgets that the Foot may crush them, or that the wild Beaft may break them. She is hardened against her young ones, as though they were not bers, ber labour is in vain without fear, becaufe God hath deprived her of Wildom, neither hath be imparted to ber Understanding. The Fact is afferted by all Travellers, that the Groupe leaves her Eggs in the Sand to be hereful by C 2 41 5

the Sun, which unnatural difregard for her Offfpring is fo remarkable, that when they fee a Mother who has little Tenderness for her Children, they compare her to an Oftrich; to which the Prophet Jeremiah alludes in his Book of Lamentations, ch. iv. 3. The Daughter of my People is become cruel, like the Offriches in the Wildernefs. In fhort, the Oftrich is allowed, on all hands, to be a very flupid foolifh Bird, defitute of that Prudence and Caution which are visible in every other Family of Infects, Birds, and Beafts; for it is particularly obferved in her, that when the is purfued by the Hunters, the runs to hide her Head, and particularly her Eyes behind a Tree, all the reft of her large Body is exposed to view; but as the no longer fees the Hunter, the wifely imagines he does not fee her, and that therefore fhe has no danger to apprehend. Now this whole abfurd and ridiculous Conduct, the infpired Writer afcribes to her want of that Wildom, Understanding and common Sense, which are to be found in every other Species of Beings, for the Production and Prefervation of their feveral Families. Becaufe God hath deprived ber of Wisdom, neither hath he imparted to her Understanding, v. 17. Were we now to extend our Enquiries to the Polity, Architecture, and Oeconomy of Bees and Wafps, and all the other Tribes and Families of Infects, we should find them in many respects excellent Monitors to the Bulk of Mankind. " \* The Beehive, for inftance, is a School to " which

\* Spectacle de la Nature, Dial. 7. p. 135.

" which numbers of People ought to be fent. " Prudence, Industry, and Benevolence, pub-" lick Spirit, and Diligence, Oeconomy, Neat-" nefs, and Temperance, are not only practifed " by them in the most exemplary manner, but " ftrongly recommended to us by their Ex-" ample. Look on a Swarm of Bees, and ob-" ferve the Difposition that influences every In-" dividual; they all labour for the general Ad-" vantage; they are all fubmiffive to the Laws " and Regulations of the Community; there " is no particular Interest, and consequently " no Emulations nor Competitions for Gain or " Glory; no Diffinctions, but those which Na-" ture and the Neceffities of the Family have "introduced among them. We never fee them " diffatisfied with their Condition, or inclinable " to abandon the Hive, in Difgust to find them-" felves Slaves or Neceffitous. On the contrary, " they think themfelves in perfect Freedom, " and perfect Affluence, as indeed they are: " they are free, becaufe they depend only upon " the Laws; they are happy, because the Con-" course of their several Labours inevitably pro-" duce an Abundance, that conflitutes the Riches " of each Individual. Let us compare Human " Societies with this, and they will appear al-" together monstrous. Necessity, Reason, and " Philosophy, have established them under the " commendable Pretence of mutual Aids and " Benefits; but a Spirit of Selfishness destroys " all; and one half of Mankind, to load them-" felves with Superfluities, leave the other half · " deftitute 3

" destitute of the common Necessaries of Life." In short, upon the strictest and closest Enquiry we can make into the feveral Tribes of Families of the Brute-Creation, it will appear, that they are all directed and act by fome Principle analogous at least, and equivalent to what we call Understanding in ourselves; and why we should call it by any other Name in them, I confess I am at a loss to determine. If then the feveral Species of Brutes do by the Strength of their own Understandings, think, reason, project, contrive, and perform every Office within their proper Sphere of Life and Action in a just and due proportion to what we do in ours, they must be allowed to have some immaterial Principle within them, in which these Faculties are inherent, and by which they are directed. Now, to my poor Apprehenfion, Understanding without a Soul, and a Soul that is not a Spirit, appears quite as abfurd as Light without Flame, or Flame without Fire; the one I think naturally supposes and includes the other.

The Great Mr. Locke, in his Effay on Human Underftanding, lib. 2. cap. 11. allows that Brutes have Ideas, and that they reafon, tho' they are not capable of comparing and comprehending these Ideas, and reafoning abstractedly, as we do. Yet (fays he) if they have any Ideas at all, and are not mere Machines, as fome would have them, we can't deny them to have fome Reafon. It feems to me as evident, that they do in fome inflances reafon, as that they have Senfe; but it is only in particular

ticular Ideas, just as they received them from their Senfes. --- Just as they received them from their Senfes!----Why, how fhould it be elfe? What is the Foundation of our Reafon, but those particular Ideas we receive from our Senfes? Ideas are Images, excited or imprefied upon the Soul by external Objects, thro' the Mediation of the Senfes; and the enlarging, comparing, and combining these Ideas, and forming practical Conclusions from them, is the whole Province of Human Reafon. This philosophical Limitation of the Understanding of Brutes, founds a little aukwardly from this great Man. because he has allowed the most exalted Human Understanding no better Materials to work upon. He has very justly exploded the Notion of innate Ideas, and has by confequence left us nothing but those which we receive by Senfation, to be the Ground-work of our most refined Speculations. Why then will he not allow the fame uniform Effect to be produced by the fame uniform Caufe in both ? Why does he take to much pains to perfuade himself and us, that Rationality in Brutes must proceed from a quite different Caufe, from what it does in ourfelves? What is he afraid of ? What would be the terrible Confequences of fuch a Conceffion? For my own part, I think I fee none, but what your own excellent Understanding will, with a little Recollection, eafily evade, without the least violence either to Reafon or Revelation. He concedes, indeed, to the main Point, and allows the Rationality of Brutes ;

Brutes; but, for fear of allowing them immaterial, and confequently immortal Souls, he frequently infinuates, that Thought, Rationality, or Reflection, is not the absolute Privilege of immaterial Beings, but may be communicated by the Power of God to certain Portions of Matter, differently modified, and confequently that Matter exalted to a certain degree of Purity, may be as capable of Reafon and Reflection, as an immaterial Spirit. And in his Difpute with the Bishop of Worcester, who justly charged him with this unphilosophical Notion, he was reduced to a necessity of afferting it in plain and express Terms, and of putting all his Philosophy to the utmost stretch, to reconcile it to Reason and common Senfe; which, I humbly conceive, is abfolutely impossible. Yet he frequently and directly afferts the Poffibility of Thinking Matter, allowing to his material Animal Senfe, Perception, Reafon, fpontaneous Motion or Volition, which, one would imagine, that nothing but Vanity, an Itch of Singularity, or a Defire of Victory, could ever have extorted from fo great and excellent a Perfon : and I cannot pass it by without fome little Examination, for which I shall offer at no Apology to a Lady of your inquifitive Genius, and superior Understanding, directed folely by Reafon and the Nature of Things." without the Prejudices of vulgar Errors, or the Subtilties of Philosophy, falsely to called.

The most obvious Idea we have of Matter, is of an extended impenetrable, folid Substance, uncapable of moving itself, or of being moved, but by

by the Agency and Impression of some superior, external, active Caufe; from whence it will unavoidably follow, that mere Matter, however modified, exalted, or purified, will be as uncapable of Self-motion, as it was in its loweft state of Density, or Depression ; and consequently cannot, by any Power, be transmuted, or fublimated into a living, felf-moving Substance; from whence it follows, that all Gravity, Attraction, Elasticity, Repulsion, and whatever Tendencies to Motion are observed in Matter, and commonly called natural Powers of Matter, are not Powers implanted in Matter, or poffible to be made inherent in it; but are intirely owing to fome Impulse, or Force impressed upon it from external Caufes. And the most that can be faid, is, that Matter is indeed fusceptible of Motion, or capable of being moved, but that the Motion itfelf must proceed from some external Cause, totally diffinct from, and fuperior to Matter. Mr. Locke, therefore, had very little Reafon to be fo peremptory in his Difpute with the Bifhop of Worcester, about the Pollibility of Thinking Matter; where, to prove it possible, he fays, Vol. 2. p. 144. Edit. 1715. for example, God creates an extended solid Substance, without superadding any thing elfe to it, and so we may · confider it at reft; to some parts of it he superadds Motion, but it has still the Essence of Matter. Other parts of it he forms into Plants, with all the Excellencies of Vegetation, Life, and Beauty, which is to be found in a Roje or a Peach-tree, above the Effence of Matter in general, but it is fill still but Matter: To other parts he adds Sense, or spontaneous Motion, and those other Properties that are to be found in an Elephant. Hitherto it is not doubted but the Power of God may go; but if we venture to go one Step further, and fay, God may give to Matter Thought, Reason, and Volition, as well as Sense and spontaneous Motion, there are Men ready to limit the Power of the Omnipotent Creator, and tell us he cannot do it; because it destroys the Essence, or changes the esfential Properties of Matter, &c. Well! and a very good Reafon it would certainly be; for Omnipotence itself cannot produce Impossibilities, cannot effect Contradictions, cannot make the fame Thing to be, and not to be, at the fame time; cannot make a Substance, which, as folidly extended, must refist all Change of State, become (while it continues unactive and dead) Life, Senfe, and fpontaneous Motion; for that is directly affirming, that the fame Portion of Matter, which is unactive, dull, and dead, may be at the fame time living, fenfible, and fpontaneoufly moving. To fay the truth, his Zeal to support his Argument, and confound his Adverfary, has thrown him into fuch Inconfistencies of Thought and Expression, 29 could never have proceeded from cool and fo-For Instance, where he fays above, ber Reason. To some parts of Matter, God superadds Motion, but it has still the Essence of Matter. What does he mean by faying, It bas still the Essence of Matter? Does he mean, that Motion has the Effence of Matter, or is effential to it, or a Mode of

of it: Neither of these could be his Meaning; he could only mean, that that Portion of Matter to which Motion is fuperadded, has still the Effence of Matter. Who doubts it? And therefore is intirely diffinct from the Motion fuperadded, which is really and truly nothing lefs than an Emanation or Impression from the Original and Eternal Fountain of Life and Power; and, confequently, intirely diftinct from Matter. If Solidity, Inactivity, and Refiftance, be the effential Properties of Matter, it will unavoidably follow, that all those Effects commonly afcribed to certain natural Powers refiding in Matter, are immediately produced by the Power of an immaterial Being, who first created this dead Substance Matter, originally impressed, and still continues to impress Motion upon it. Now whatfoever begins Motion where it was not, and ftops it where it was, that effects a Change from Reft to Motion, and from Motion to Reft, and that arbitrarily, can never be Matter, whole effential Property it is neceffarily to refift all change of its State, either of Reft or Motion. I therefore conclude, that whatever Principle or Being can arbitrarily effect a Change of the prefent State of Reft or Motion, in that Portion of Matter which composes the Body of any Animal, cannot be the Matter of the Body itfelf, which neceffarily refifts or opposes all change of its prefent State, and therefore must be concluded to be an active, immaterial, and spiritual Substance, which, without any violence to Philosophy, we may venture to call a Soul. Pardon me,

me, Madam, for leading you into this intricate dry Speculation; my Subject led me into it, and requir'd fome little Examination in this place. Some further Confiderations upon this Subject, and the Reverend Father's devilish Contrivance to account for all animal Functions and Operations, without allowing them to have Souls, we shall defer to a more proper Place, and proceed to the next Head of Inquiry.

### II. Of the Necessity of a Language between Brutes.

By Language we are not only to understand a Sequel of articulate Sounds, by which Men have agreed to express their Ideas and Sentiments to each other, but any fort or kind of inarticulate Sounds, Geftures, or Motions, by which, in the feveral Tribes and Families of the Brute-Creation, the Individuals communicate their Sentiments, their Wants, their Defires to each other : and these are, no doubt, as different as the Species themfelves, and as expressive and fignificant to them as our most articulate Sounds can be to us. Of this there can be no manner of doubt, especially among those that, live in forciety, as particularly Pigeons, Rooks, Swallows, and Storks among Birds; Bees and Ants among Infects; and particularly the Beavers among Beafts; and no doubt but there must be the fame among Fishes, those especially which at certain Seafons remove in Shoals to different parts of their Element. All, and each of these, fpeak,

fpeak, undoubtedly, a Language proper and peculiar to their funcies, which are as experime and intelligible to them, as our Language is to us; and may, not improperly, be called the different Dialects of the Language of Nature.

Our Author, in the midd of this Inquiry, has dropp'd an Expression which I cannot understand, as having no apparent relation to his Subject, or any Connection with what goes before, or follows after. Page 27, He lays, Angels /peak to each other, yet have no Voice. How bold, how crude, how unphilosophical is this Expresfrom? Have Angels a Voice to speak to us, and mene to fpeak to one another? Did he never read of the Conversation of Angels with the Patriarchs and Holy Men of the Old Teffament? Of the Angel Gabriel delivering a Mediage from God so Lacharias, concerning the Birth of John the Baptift, Lucke i, and another to the Bleffed Kirigin, concerning the Incarnation of our Lord Telis Chrift? Did he never read of the Voice of the Archangel, 1 Tiheff, iv. 162 If he only means, that they have not a Voice like us, articudated by the Organs of the Haman Body, and different Modulations of the Air ; who diffutes it? But is this fufficient to justify him in faying they have no Voice ? ... Does to allow a Voice, or formething equivalent to it, to the lowest Orders of Brutes and Infects, and will he allow some no the highest Orders of intellectual Beings ? How durprizing, how maccountable is this? Surely the had as more an Opinion of the good Senferof and the set of the • •

ł

the fine Lady to whom he was writing, as he had a good one of his own. But to return:

He observes, very justly, that we have a thoufand ways of expressing our Passions, our Sentiments, our Hopes and Fears, our Defires and Wants, our Joys, or Sufferings, without the Me-When we are pleased (fays diation of Words. he, pag. 23.) every thing in us speaks : Do we not continually speak by certain Looks, by a Motion of the Head, a Gesture, nay the least Sign in the World? Ay! and when we are difpleafed , or angry, we can as eafily make ourfelves underftood by Looks and Gestures, as by the plainest and most expressive Language. How often have I feen those lovely Eyes of yours rebuking, with unutterable Eloquence, the affuming Coxcomb, and the malicious Prude, into Silence and good Manners? How many melting Address have you received from the Eyes of your languishing Admirers, who had neither Courage nor Merit enough to address themselves in any other Language ? In thort, languithing modest Lovers refemble a Nation or Society of dumb People, who are never at a loss for a Set of fignificant Looks, Motions, and Gestures, to supply the want of Words, and Defect of other Expressions; and which form a Language as expressive and intelligible to them, as the most articulate Language in the World can be to other People. Now can any one reasonably doubt, whether the Brute-Animals have the Power and Means of doing the fame? It is, I think, undeniable, that they have all a knowing Faculty; but to what purpole

pole can we suppole the all-wife Author of Nature has given them this Faculty, but to enable them to provide for their Wants, their Prefervation, and whatever is fit for their Condition, and fuitable to the peculiar kind of Life he has appointed for them. Let us, moreover, confider that many Species of Birds, Beasts, and Insects are made to live in Society at large, and others. to live in a kind of domestic Society, Male and Female cohabiting together, in a kind of Family,. for the Education of their Young-ones. Now, do but confider what Ufe could the first Species make of their Understanding, for the Preservation and Welfare of their Society, and of course for their own peculiar Good, arifing from the publick Prosperity, if the Members of that Society have not among themfelves a common Language perfectly known to every one of them ? What Use could they make of their Knowledge and Understanding, if they had not some Method of communicating their Knowledge, Advice, and Affistance, to each other? If they could not understand, or be understood by each other, they could neither give nor receive any Comfort, Affistance, or Help from Society, and without fuch a Communication it would be abfolutely impoffible for fuch a Society to fubfift; in a word, no more Communication, no more Society.

For the better understanding the Necessity of this Communication, let us take a nearer View of those particular Families among the Beasts, Birds, and Insects, that seem most to want and

1

and to use it, those I mean that live in Society. Among the Beafts, we will particularly confider the Beaver, who for his fingular Sagacity, Patience, Industry, and Skill in Architecture, feems to excel all the quardruped Fami-Iv. \* " The Beaver is a Creature particular-" ly remarkable for the use made of his " Skin, but most of all, for the Dexterity with " which he builds his Habitation. The Beaver, " whether Male or Female, has four Bags un-" der his Intestines, impregnated with a refi-" nous and liquid Substance, which when it is " ejected settles into a thick Confistence, of which " he makes a fingular use in the building his " Habitation. The Phyficians call it Caftor, " and prefcribe it as an excellent Remedy a-" gainft Poifons, Vapours, and other Indifpo-" fitions; when it grows old, it blackens and " degenerates into a dangerous Poifon. He is " furnish'd with three very useful Implements " for building, his Teeth, his Paws, and his " Tail. His Teeth are ftrong and deeply ri-" veted into his Jaws, with a long and crooked " Root; with these he cuts, as well the Wood " for his Building, as that which furnishes him " with his Food. His fore Feet refemble those " of fuch Animals as hold what they eat in " their Paws, as Apes for inftance, Rats, and · Squirrels; with these Feet, he digs, softens, " and works the Clay, which is extremely fer-" viceable to him. His hind Feet are accom-" modated with Membranes, or large Skins "between

\* Spectale de la Nature, Disl 12. p. 77.

" between his Toes like those of Ducks, and " other Water-Fowl. His Tail is long, a little " flat, entirely covered with Scales, fupplied " with Muscles, and perpetually lubricated with " Oil or Fat. This Animal, who is an Ar-" chitect from his Nativity, uses his Tail in-" ftead of a Hod, for the Conveyance of his " Clay or Mortar, and a Trowel to fpread and " form it into an incrustation; the Scales pre-" vent these Materials from penetrating the Tail " with their Cold and Moisture; but the Scales " as well as the Tail would be injured by the " Air and Water, if it were not for the pre-" vention of an Oil, which he distributes all " over them with his Snout; and the four Bags " I have mentioned, are undoubtedly the Ma-" gazine of this Fluid.

" The Beavers inhabit the fame Manfion " in great Numbers, unless violent Heats, or " Inundations, the Pursuits of Hunters, Scar-" city of Provisions, or an extraordinary Increase " of their Offspring oblige them to fepa-" rate. In order to fix their Settlement, they " chufe a Situation that abounds with Provi-" fions, and is wash'd by a Rivulet, where they " may form a convenient Refervoir of Water " for their Bagnio. They begin with Build-" ing a Mole or Caufey, in which the Water " may rife to a level with the first Story of " their Habitation. This Caufey at the Foun-" dation may contain ten or a dozen Feet in " thickness: it descends in a flope on the Side " next the Water, which in proportion to its " Elevation Ε

" Elevation gravitates upon the Work, and " preffes it with a ftrong tendency towards the " Earth. The opposite Side is raifed perpen-" dicular like our Walls, and the Slope, which " at its Bafis is twelve Foot broad, diminishes " towards the top, whole breadth does not " exceed two Feet. The Materials of this Work " are Wood and Clay. The Beavers with ad-" mirable facility cut the Pieces of Wood as " thick as one's Arm, others as large as one's " Thigh, and from two to four, five, or fix " Foot in length'; and fometimes more, in proor portion to the Alcent of the flope : They drive " the extremity of these very near each other into the Earth, and take care to interlace them -" with other Stakes more flender and fupple. " But as the Water without fome prevention would glide through the Cavities, and leave " the Refervoir dry, they have recourse to a " Clay, which they prefently know how to " procure, and with it they close up all the " Interflices both within and without; and this " entirely prevents all Evacuation; they con-" tinue to raife the Dyke proportionable to the " Water's Elevation and Plenty. They are like-" wife very fenfible, that their Materials are not " fo eafily transported by Land as by Water, " and therefore take the Opportunity of its " increase to swim with Mortar placed on their " Tails, and Stakes of Wood between their " Teeth, to every Place where they have ocse cafion for those Materials. If the Violence " of the Water, or the Foot-steps of Hunters, au 1911 - Cal " who

" who pais over their Work, damage it in any degree, they immediately repair the Fracture, vifit all the Edifice, and with indefatigable Application refit and adjust whatever happens to be disconcerted; but when they are too frequently perfecuted by the Hunters, they only work in the Night, or else discontinue their Labours.

"When the Caufey or Dyke is compleated, " they begin to form their Cells, which are " round or oval Apartments, divided into three " Partitions, raifed one above another; the first is " funk below the level of the Dyke, and gene-" rally full of Water ; the other two are formed " above it. They raife this Structure in a very " folid manner on the edge of their Caufey, " and always in Stories, that in cafe the Wa-" ter should ascend, they may remove to a " higher Situation; if they find any little Island " near the Refervoir, they fix the Dwelling " there, which is then more folid, and they " less incommoded with the Water, in which " they are capable of continuing but a thort " time : but if they are not favoured with this " Advantage, they drive Stakes into the Earth " with their Teeth, to fortify the Building " against the Winds and Water. At the bot-" tom they strike out two Openings to the " Stream; one conducts them to the Place where " they bathe, and which they always keep very " decent ; the other is a Paffage to that quar-" ter, where they carry out every thing that " would foil or rot the upper Apartments. There " is E 2

" is a third Aperture much higher, calculated " to prevent their being fhut up, when the " Ice has closed the Openings into the lower " Lodgments. They fometimes build their " House intirely on the dry Land, and fink " Ditches five or fix Feet deep, in order to " defcend to the Water. They employ the fame " Materials and Industry in the Structure of their " Dwelling, as they use for their Causey. The " Walls of the Building are perpendicular, and " two Feet thick. As their Teeth are more " ferviceable than Saws, they cut off all the Pro-" jections from the Wood, that stand out beyond " the Perpendicular of the Wall, after which " they work up a mixture of Clay and dry Grafs, " into a kind of Mortar, with which, by the " Aid of their Tails, they rough-cast the out " and infides of the Work.

" The Edifice is vaulted within like the " handle of a Basket, and generally rifes in an " oval Figure. The Dimensions are propor-" tioned to the number of the intended In-" habitants. Twelve Feet in length, and ten " in breadth are fufficient for eight or ten " Beavers; if the number increases, they en-" large the Place accordingly. It has been af-" ferted for a Truth, that there have been " found above four hundred of these Creatures " in different Lodgments communicating with " one another. But these popular Societies are " very rare, because they are too unmanage-" able and tumultuous, and the Beavers are " generally better acquainted with their own " Interests. "Interefts. They affociate to the number of ten or a dozen, and fometimes a few more: they are a fet of amicable and fagacious Inhabitants, in whofe mutual Society they may propofe to fpend the Winter together in a very agreeable manner; they are gifted with a natural Arithmetick, which enables them to proportion the Place and Provifions to the Neceffities of the Company; and as it is cuftomary for every Individual to continue in the conftant Poffeffion of his own Cell, they never charge themfelves with unneceffary Expences for any accidental Guefts.

"There are fome Beavers called Terours, "who make their abode in Caverns dug in a "rifing Ground, either on the Shore or at fome diftance from the Water, to which they fcoop "out fubterranean Trenches from their Ca-"verns, which defcend from ten to an hundred Feet in depth. Thefe Trenches farnish them with retreats fituated at unequal heights, and wherein they enjoy a shelter from the Water when it ascends. Their Beds are made of Chips, which serve them instead of a Quilt; and of Grass, which accommodates "them in the nature of a Feather-Bed.

"All these Works, especially in the cold Re-"gions, are compleated in *August* or *September*; after which Period, they furnish themfelves with Provisions. During the Summer Season they regale themselves with all the Fruits and Plants the Country produces. In the Winter they eat the Wood of the Ash, "the

Digitized by Google

" the Plane, and other Trees, which they fleep " in Water, in Quantities proportionable to " their neceffary Confumption; and they are " fupplied with a double Stomach, to facilitate " the Digeftion of fuch a folid Food at two " Operations. They cut Twigs from three to " fix Feet in length; the large ones are con-" veyed by feveral Beavers to the Magazine, " and the fmaller by a fingle Animal : but they " take different ways, each Individual has his " Walk affigned him, to prevent the Labourers " from being interrupted by their mutual Oc-" calions. The Dimensions of their Pile of " Timber are regulated in proportion to the " number of the Inhabitants; and it has been " observed, that the Provision of Wood for " ten Beavers, comprehended thirty Feet in a " fquare Surface, and ten in thickness. These " Parcels of Wood are not piled up in one con-" tinued Heap, but laid cross one another, with " Interflices between them, that they may the " better draw out what Quantity they want, " and always take the Parcel at the bottom, " which lies in the Water : they cut this Wood " into fmall Particles, and convey it to their " Cells, where the whole Family come to re-" ceive their particular Share. Sometimes they " expatiate in the Woods, and regale their " young with a new Collation. The Hunters, " who are fenfible that these Creatures love " green Wood better than old, place a Pareel " of the former about their Lodge, and then " have feveral Devices to enfnare them. When " the

3

" the Winter grows fevere they fometimes break " the Ice, and when the Beavers come to the " opening for the Benefit of the Air, they kill " them with Hatchets, or make a large Aperture " in the Ice, and cover it with a very ftrong Net, " and then overturn the Lodge; upon which the " Beavers, who think to escape in their usual way " by flying to the Water, and emerging at the Hole " in the Ice, fall into the Snare, and are taken."

Among the Birds let us take a View of the different Tribes of those which are particularly called Birds of Paflage, who pafs in great Bodies or Flocks from one Climate to another; fome feeking for a cold, others a hot, others a temperate Region : fuch particularly as Quails, Swallows, Wild-Ducks, Plovers, Woodcocks, and Cranes \*. In the Spring, the Quails pais from Africa into Europe, to find a more tolerable and moderate Summer than they could enjoy in the Country from whence they came. Toward the close of Autumn, they return over the Mediterranean to obtain in Barbary and Egypt a gentle heat, correspondent to the Climates they abandoned, when the Sun was on the other fide of the Equator. They take their flight in Troops, that fometimes refemble Clouds; they frequently cover Ships, and the Sailors take them without difficulty.

As for the Swallows, it was usually thought that they croffed the Seas at the different Seasons of the Year, but it is much more probable that in these Northern Countries, they conceal themselves

• Spectacle de la Nature, Dial. 11. p. 48, 49, 50.

themfelves in the Caverns of the Earth, riveted to one another with their Claws and Bills. They flock to Places unfrequented by Men, or even bury themfelves in the Water ; the Precaution they take to lubricate their Feathers with their own Oil, and to roll themfelves up like a Ball, preferves them in the Water, and even under the Ice. They are there benumbed, and pass the whole Winter without Motion. The Heart however has a conftant palpitation, and the Warmth revives them at the return of the Spring ; they then revisit their former Habitations, and each Individual finds out his own Country, and even his particular City, Village, and Neft.

As to Wild-Ducks and Cranes, both the one and the other, at the approach of Winter, fly in quest of more favourable Climates: They all affemble at a certain Day, like Swallows and Quails, they decamp at the fame time, and 'tis very agreeable to observe their Flight; they generally range themfelves in a long Column like an I, or in two Lines united like a V reverfed. The Duck or Crane who forms the Point, cuts the Air and facilitates a Paffage to those that follow; but he is charged with this Commiffion, only for a certain time, at the conclusion of which, he wheels about into the Rear, and another takes his Post. It is very common, but yet a very furprizing Obfervation, to fee how regularly the Swallows meet upon a certain Day, in order to depart all together, and every Circumstance of their Journey has fomething in it almost miraculous in their Progress over Seas : and

and Kingdoms, one knows not which to admire most, the force that fustains them in fo long a Passage, or the order in which the whole is accomplified. Who acquainted their Young, that it would foon be necessary for them to forfake the Land of their Nativity, and travel into a ftrange Country? Why do those who are detained in a Cage, express fo much Difquietude at the Seafon for the ufual Departure, and feem to be Afflicted at their Inability to join the Company? What particular Bird charges himfelf with the Care of affembling a Council, to fix the Day of their Removal? Who founds the Trumpet to inform the Tribe of the Refolution taken, that each Party may be prepared? Whence have they their Almanack to instruct them in the Seafon and Day when they are to be in motion? Are they provided with Magistrates and Officers to preferve the Difcipline which is fo extraordinary among them ? For not one of them dillodges till the Proclamation has been publish'd, and not a Deferter is feen on the Day that fucceeds their Departure. Have they Charts to regulate their Voyage by? Are they acquainted with the Islands where they may reft, and be accommodated with Refreshments? Are they furnished with a Compass to guide them infallibly to the Coast they would steer to, without being disconcerted in their Flight by Rains or Winds, or the difmal Obscurity of many Nights? or are they endued with a Reason superiour to that of Man, who has not Courage to attempt fuch a Paffage, without

without a Multitude of Machines, Precautions, and Provisions? Where would be the Danger or Abfurdity of afcribing all this to Reafon? A Reason limited and circumscribed within the narrow Bounds of their own Sphere. A Reafon fufficient to direct them to the Means of preferving and increasing their several Families, and answering the several Ends of their Being, and the Purposes of their Creation. A Reason not superiour to that of Man, because the Reason of Man is vast and comprehensive, taking in the whole Compais of Nature, looking forwards and backwards into Eternity; whereas the Sphere of Action allotted to Brutes, is contracted into a very narrow Compass, and confined to a few Articles of Life and Action; in which too, perhaps, the exquisite Structure of their Organs, and the Tenuity and Purity of their Juices and animal Spirits, not corrupted, or impaired by Luxury, and Intemperance, may, possibly, give them a confiderable Advantage over the greater part of the Human Species. But more of this in its proper Place.

Let us next descend to the various Tribes of Infects, which, tho' vile and contemptible in their Appearance, yet each of them in their feveral Ranks and Stations proclaim aloud the infinite Wisdom and Power of their Creator. Their Variety, their Dispositions, their Sagacity, their Policy, their Industry, the wonderful Proportion of their Organs, the Delicacy of their Structure, and a thousand other Curiosities obfervable in every Spesies, are matter of infinite Delight

Delight and Pleasure to a curious and inquisitive Genius; but were we able to examine them in a nearer View, could we be capable of knowing the direct Purposes of infinite Wildom in their Creation, the Relation they bear, and the harmonious Proportion they stand in to the univerfal System, it would afford us infinite matter of Aftonishment and Surprize, as well as of religious Reverence and Adoration to their Onrnipotent Creator. Small and contemptible as they appear to us, they are really formed with the most exquisite Symmetry, the most delicate Proportion. Vulgar Prejudice may confider them as the Effect of Chance, and the Refuse of Nature; but an attentive Eye, affifted by the help of Microscopes, discovers in them astonishing Marks of infinite Wildom, which, far from neglecting them, has been particularly careful to cloath, arm, and accommodate them with all the Inftruments and Faculties necessary to their Condition. This it is \* that has arrayed them, even to a degree of Complaifance, by laying out fuch a Profusion of azure, green, and vermillion, Gold, Silver, and Diamonds, Fringe, and Plumage, upon their Robes, their Wings, and the Ornaments of their Heads. We need only behold the Ichneumon, Spanish Dragon, and Butterfly, nay, a Caterpillar itfelf, to aftonish us with this Magnificence. The fame infinite Wildom, which has been to liberal in their Ornaments, has completely armed them for making War, and affaulting their Enemies,

\* Spectacle de la Nature. Dial. i. p. 7, 8. F 2

29

as well as defending themselves. The generality of them are provided with strong Teeth, a double Saw, a Sting with two Darts, or vigorous Claws, and a scaly Coat of Mail, for the Defence of their whole Body. The Safety of the greatest part of them confists in the Agility of their Flight, by which they eafily avoid the Danger that threatens them : Some by the Affiftance of their Wings, others by a Thread that supports them, when from the Leaves on which they live, they throw themfelves at a diftance from their Enemy; and others by the Spring of their Hind-feet, whole Elafticity immediately launches them out of the reach of Danger, and when they are defititute of Force. Stratagem, and Cunning, supply the want of the common and ordinary Means of their Prefervation.

This is very wonderful; but our Wonder increafes, when we attentively confider the different Organs and Implements with which each of them work in their feveral Professions: Some fpin, and have a couple of Distaffs, and Fingers to form their Thread; others make Nets and Lawn, and for that purpose are provided with Shuttles, and Clues of Thread. There are fome who build in Wood, and are therefore fupplied with two Bills for cutting their Timber. Others make Wax, and have their Shops furnish'd with Rakers, Ladles, and Trowels. Most of them have a Trunk, more wonderful for its various Uses than the Elephant's, and which to fome ferves for an Alembic for the diffillation distillation of a Syrup Man can never imitate; to others it performs the Office of a Tongue; many employ it as a Drill for piercing, and the generality of them use it as a Reed for Suction. Several, whole Heads are fortified with a Trunk, a Saw, or a couple of Pincers, carry in the other extremity of their Bodies an Augur, which they lengthen and turn at difcretion; and by that means dig commodious Habitations for their Families in the Heart of Fruits, under the Bark of Trees, in the Substance of Leaves or Gems, and frequently in the hardest Wood itself. There are few who have excellent Eyes, but have likewife an additional Benefit of a couple of Horns, or Antennæ, that defend them; and as the Animal moves along, efpecially in the dark, make a tryal of the Way, and difcover by a quick and delicate Senfation, what would defile, drown, or endanger them; and if they find these Horns moistened by any offensive Liquor, or bend by the Refiftance of a folid Body, the Animal is warned of the Danger, and turns another way. Now all these Motions, even of the minutest Animals, however accidental or capricious they may appear to us, are as really directed to a certain End, as those of the largest Beings: we shall find all the Sagacity and Cunning we admire in a Fox, for chuling himfelf an advantageous Kennel, providing for himfelf and his Family the Necessaries of Life, and avoiding the Snare of the Gin, and the Perfecution of the Hunter : The fame Industry with which we fee a Bird build itfelf a convenient Neft, provide

vide for the Subfistence of itself and Young-ones, and elude the Snares of the Fowler; you will find the fame Care, the fame Sagacity, actuating the smallest Infect for the Prefervation of itfelf and its minute Posterity. The Parent is feldom, or never, deceived in the natural Choice of Means for its own Prefervation, or the Security and Education of its Young-ones. Diffolve a Grain of Pepper in Water, you may difcover by the help of a Microfcope, Worms of an incredible Smallness, swimming in the Fluid. The Parent, who knows this to be their proper Nourishment, never lays her Eggs in any other Place. Look through a Microscope at a Drop of Vinegar, there you will discover a number of little Eels, and never any other Animals, because one particular Creature knows, that Vinegar, or the Materials that compound it, is proper for her Family, and therefore deposits them either in that Matter, or in the Liquor itself, and no where elfe. + In those Countries where the Silk-worm feeds at large in the Fields, her Eggs are only to be found on the Mulberrytree : 'tis eafy to fee what Interest determines her to that Choice. You will never find upon a Cabbage any Eggs of the Caterpillar that eats the Willow; nor fee upon the Willow the Eggs of any Caterpillar who feeds upon Cabbage. The Moth feeks for Curtains, Woollen Stuff, dress'd Skins, or even Paper, because its Materials are Fragments of Cloth, which have loft the bitter Flavour of Hemp, by the work-

+ Spectacle de la Nature. Dial. i. p. 19.

ing

ing of the Paper-mill. In fhort, every Species of Animals, from Man the Lord of the Creation. to the minutest Infect that the naked Eye, or the Microscope can discover, act with Regularity and Uniformity, with all the Marks of Wifdom, Sagacity, and Prudence, within their feveral Spheres of Action, for the Prefervation of their Being. the Propagation of their Species, and answering the feveral Ends and Purpofes of Providence in their Creation, and the Rank which they hold in the System of Nature.--But what am I doing ! --- Pardon me, Madam, my Purfuit of this copious and delightful Inquiry, has led me off from the main Question I proposed to confider, which was, the Necessity of forme Language, fome Means of communicating the Sentiments, Wants, Inclinations, and Defires of the Individuals of every Society and Family, in order to confult and provide for the Safety and Happiness of the whole. The mutual Wants of Society, the Care and Education of a Family, must be in some sense, and to a certain degree, the fame in all Societies and Families of Birds and Beafts, Reptiles and Infects, as well as of Men; and without fome kind of Language, fome Method of Communication, those Wants could never be known, nor those Neceffities effectually supplied. All Creatures, therefore, that live in fociety, who divide the feveral Duties and Offices of that Society among the Individuals, who appoint to every Member their diftinct Offices, their peculiar Posts, their particular Provinces, must of necessity have some Language,

guage, be it what it will, fince, without this Help it is quite impoffible for any Society to fubfift. Now, tho' all Animals do not incorporate in large Societies, yet all have Families, domeftic. Engagements, Cares, and Neceffities, which require mutual Help and Affiftance, and by confequence a certain Language, by which their mutual Wants, Inclinations, and Necessities may be difcovered and made known to each other; fo that every Species of Animals feem to have the fame want of a Language, of some kind or another, as those which live in great Societies: for as all Societies are but Affociations of Families or Individuals, whatever infers the Neceffity of a Language in one cafe, infers it equally in all.

It would be hard to affign a Reafon why Nature, or rather the all-wife Author of Nature, who always acts uniformly, should deny fome of them a Privilege he has granted to the reft. It is a general Observation that all the Productions of Nature are uniform, that as the is fparing in Superfluities, fo fhe is rather profuse in things neceffary, and upon the whole does nothing in vain: but is it not necessary that a Couple of Animals, joined to form a Houshold and Family together, a Couple of Birds for instance, fhould be able to understand, and mutually to impart their Sentiments and Thoughts to each other? Let us return to the old Supposition of two People absolutely dumb, living together in the fame Houfe, without the Affiftance of any other Person; I defy the Union to sublist, if they have no means left of agreeing about their Affairs,

Affairs, and expreffing their mutual Wants and Neceffities. Two Sparrows, two Foxes, two Whales, will lie under the fame Impoffibility of living together; and all the Inconveniencies of the dumb Society I have mentioned, will be feen in their respective Families : In a word, the Neceffity of a Language between a Husband and his Wife, to enable them to live together, upon which human Societies fubfift, is, in due degree, the fame in all the Species of Beings below them, in every Tribe and Family of the Brute-Creation.\* Could it be fuppofed, that there were any Race of Animals in the Universe capable of producing their Kind in absolute Solitude, without the Intervention of a different Sex, it must be confessed the Faculty of Speech to them would be quite a ufeless Talent: but wherever two Beafts, or two Birds, shall stand in an habitual Need of each other, and form among them a lafting Society, they must of necessity speak to each other. How is it to be conceived, that in the Gallantry of their first Addresses to each other, their mutual Concern and Vigilance for each other's Welfare, and the neceffary Cares that attend the Education of their Families, they should not have a thousand things to fay to each other ? It is impossible in the order of Nature, that a Sparrow, or a Turtle, that is fond of his Mate, fhould be at a lofs for proper Expressions to difcover the Tenderness, the Jealousy, the Anger, the Fears he entertains for her, in the feveral In-

\* Philosoph. Amusement, p. 36, 37; Se.

cidents

cidents of Life that must arise betwixt the most loving Couple, in the course of a long Cohabitation. He must scold her when she plays the Coquet, he must bully the Sparks that make Attempts upon her Virtue, he must be able to understand her when she calls to him; he must, whilst she is affiduously sitting upon her Brood, be able to provide Necessaries for her, and know distinctly what it is she wants or calls for; whether it be something to eat, or Materials to repair her Nest; in all which, a Language, of some fort or other, is absolutely necessary.

Our Author reafons fo pertinently and confiftently upon this Head, that I shall chufe to give you the two or three following Paragraphs in his own Language.

" Many Beasts, one will fay, have not a fet-" tled and permanent Houshold like Birds, (for " by-the-bye, Birds are the most perfect Mo-" del of conjugal Constancy and Fidelity:) this " I very well know, and their Number is " even very great. Such are Dogs, Horfes, Deer, " and almost all Quadrupeds, Fishes, and Rep-" tiles. But I shall always infist upon a Prin-" ciple, granted and acknowledged as certain; " Nature is too much like herfelf in Productions " of one and the fame Genus, as to have put " between Beasts so essential a Difference, as " that of Speaking, or not Speaking at all, " would be. Upon this Principle it is, that " though we hardly know the Seeds of Coral, " of Mushrooms, of Trufles, or Fern, we are nevertheles

Digitized by Google

is nevertheless perfuaded that these Plants pro-" ceed from Seeds, because it is the manner " in which Nature produces all the reft. Let " us then conclude, that if Nature has given " to Beafts (or Animals) living in Society, and " in a Family, the Faculty of Speaking; the " has doubtless beftowed the fame Advantage " on all the reft. For we are not now upon " those accidental Differences which Nature " loves to diversify in the different Species of " the fame Genus: there are not, pethaps, in " the whole World two Faces perfectly alike ; " but yet all Men have a Face. There are " among the feveral Species of Animals Diffe-" rences still greater : fome have Wings, others " have Fins, fome Feet and Legs ; the Serpents " have none of these : but all Animals have " the Faculty of moving and transporting them-" felvics wherever they please, according to " their Wants. Among Animals there are fome " that fee and hear more or lefs perfectly ; but " yet they all hear and fee. It is the fame thing " with the Faculty of Speech ; this Faculty, " perhaps, is more perfect in the Beafts which ", live in Societies and form Families; but it " being in some, we must believe it to be in " all of them, but more or lefs perfect, accord-1 12 "ing to their stipolive Wants.

"It is even observable, that the Animals who live neither in Society, nor in a fettled Family, yet have in each Species a fort of Germanence or Society among themselves. Such are the Quadrupeds, the Fithes, the G 2 " Reptiles, " Reptiles, the Birds themfelves independently " of their Houshold, as Starlings, Partridges, " Ravens, Ducks, and Heps. Now what Ad-" vantage could these Creatures have by endea-" vouring to live in Society one with another; " if they did it not for mutual Affistance, and " reciprocally to have the Benefit of their Know-" ledge, Discoveries, and of all the Helps they " can afford each other; and how could they do " fo, if they do not understand one another ? " All the Arguments I have already used to " prove, that the Creatures which live in So-" ciety must have a Language, here again find " their Place and their whole Energy. All the " Difference must be only in the Degrees of " Plus and Minus; and if we judge of this only " by Matters of Facts, perhaps there is no dif-" ference at all.

" " The Wolves, for inftance, hunt with great " Skill, and together contrive warlike Strata-" gems. A Man croffing a Frith, faw a Wolf " who feemed to be watching a Flock of Sheep. " He informed the Shepherd of it, and advifed " him to caufe the Animal to be purfued by " his Dog: I fhan't be fuch a Fool, replied the " Shepherd ; the Wolf yonder is there only to " divert my Attention, and another Wolf who " is working on the other fide, only watches " the Moment when I shall set my Dogs upon " this to fnatch one of my Sheep from me. " The Man who was passing by, willing to " be fatisfied of the Fact, promifed to pay for " the Sheep; and the thing happened, just as " the

" the Shepherd faid it would. Does not a Stra-" tagem fo well concerted evidently fuppofe " that the two Wolves had agreed together, " one to fhew, and the other to hide himfelf? " Now how is it possible to agree in this man-" ner without the help of Speech?

" A Sparrow finding a Neft that a Martin " had just built, standing very convenient for " him, possent himself of it. The Martin " feeing the Usurper in her House, call'd for " help to expel him. A thousand Martins came " full fpeed and attacked the Sparrow : but the " latter being covered on every fide, and pre-" fenting only his large Beak at the Entrance " of the Neft, was invulnerable, and made the " boldeft of them, who durft approach him, " to repent their temerity. After a Quarter " of an Hour's Combat, all the Martins dif-" appeared. The Sparrow thought he had " got the better, and the Spectators judged " that the Martins had abandoned their Un-" dertaking. Not in the leaft. Immediately " we faw them return to the Charge; and " each of them having procured a little of that " temper'd Earth, with which they make their " Nefts, they all at once fell upon the Spar-" row, and inclosed him in the Neft to perifh " there, tho' they could not drive him thence. " Can you imagine, Madam, that the Martins " could have been able to hatch and concert -" this Defign all of them together, without fpeak-" ing to each other ?

" " Wonders

"Wonders are recounted by Travellers of " the Monkeys, when they go a plundering; " a Troop of Soldiers when they go a For-" raging, cannot march in greater Order, or " with more Precaution. I could mention, and " you can eafily recollect a thousand other Instances of the fame Nature ; but this would require a Volume, and I aim only at support-" ing my Argument. Men hitherto have al-" ways made use of these Instances to prove " that Beafts have a knowing Faculty; and they " have been in the right fo to do, because it " is really inconceivable, that Beafts can do fuch " fingular Actions without Knowledge, but we " have not sufficiently examined into the Me-" rits and Bottom of this Question; for if it be " abfolutely impossible for Beasts to perform " these Actions without speaking, we are more-" over obliged to conclude, that they have a " Faculty of fpeaking to each other. Now. " Madam, I would beg of you here to ob-" ferve, that this is not an Opinion or a System " founded upon meer Conjecture or probable " Explications, but an Argument fupported by " fenfible and palpable Facts ; I fay fenfible Mat-" ters of Fact, fuch as these I have just been " alledging, and a thousand others of every " Kind. Enter into a Wood where there are " a Parcel of Jays, the first then that sees you " gives the Alarm to the whole Troop. Mag-" pyes, Blackbirds, and almost all the Feather-" ed Kind do the fame. Let a Cat but show " herself upon the top of a House, or in a Garden, " den, the very first Sparrow that perceives her," " exactly does what a Centinel does among us, " when he perceives an Enemy; he by his " Cries warns all his Companions, and feems " to imitate the Noife of a Drum beating a "March. See a Cock near his Hen, a Dovo " near the Female he is courting, a Cat fol-" lowing his Mate, there is no end of their " Discourses, till there is an end of their Court-" ship. But there is one important Reflection " yet behind, which in my Opinion is little " less than Demonstration. We every day " fpeak to Beafts, and they underftand us very " well. The Shepherd makes himfelf under-" stood by his Sheep, but particularly by his " Dog that attends him. The Cows under-" stand all the Milkmaid fays to them. Many " a profound Conversation passes between the " Sportsman and his Dogs ; the Groom and his " Horfes; the Lady and her Parrot; Mifs and " her Cat; we speak to them all, and they " understand us; they in their turn speak to " us, and we understand them. How much more " probable is it, that they speak to and understand " each other ! for with regard to them, we can " fpeak no other than a foreign Language ; and " if Nature has enabled them to speak a foreign " Language, how can the have refuted them the " Faculty of speaking and understanding a Na-" tural one? This can hardly be conceived. " But though we should allow Understand-" ing and Language to the feveral Species of " Beafts, Birds, and Infects ; What shall we do

" with

t

" with the Fishes and Reptiles; What can we " fay for them? Has Nature been as boun-, " tiful to them as to the reft, must we al-" low them to have Speech and Understand-" ing? Can they understand and converse with " each other ? Can we imagine a Conversation " betwixt two Fishes, two Ants, or two "Worms? The Birds indeed fing, the Dogs " bark, the Wolves howl, Sheep bleat, Lions " roar, Oxen low, Horfes neigh; this every " body hears and knows : but who ever heard " the Language of a Fish, or the Conversa-"tions of Worms and Caterpillars? What-" ever Difficulty there may be in hearing or " explaining their Language, I think there can " be but little in apprehending they have one, " upon the fame general Principles laid down " before ; and fince there is a ftrong Prefump-" tion that all other Species have it, as arifing " from the Neceffity of their Nature; the Pre-" fumption feems equally ftrong for them as " for the reft. But the Difficulty lies in be-" ing able to know and diftinguish it, part " of them live in an Element forbidden to " us, and many of the others escape our Sight " by their fmallnefs. But how do we know " that Fishes have not as many and perhaps " more vocal Expressions than the Birds them-" felves? They all of them feem to be form-" ed upon the fame Model? Some fly, others " fwim; but flying and fwimming are one " and the fame Motion, the Difference is only " in the Element. We are told in the Book " of

" of Genefis, ch. i. v. 20. that God created at the fame time both Fishes and Fowls from " the Bosom of the Waters. Fishes have five " Senfes as well as Birds and other Animals, " and why should they not have the Faculty " of Speaking as well as the reft? It is true, " we cannot hear them fpeak or fing, but it is perhaps for want of proper Organs to hear " them. The Water is throughly penetrated ٠. with Air which the Fishes breathe, Why may " they not with that Air, and by means of " a Spring equivalent to the Tongue and Throat, " form Vibrations and Sounds too nice and de-" licate for our Ears, but which are eafily heard " and understood by their own Species? The " Ear of Man is extremely coarle, which is " the refult of a necessary Providence; for were " our Ears fenfible of the minutest Vibrations ٢٢ of the Air we live in, we fhould be for " ever funned with a thousand confused Noises, " which would never permit us to diftinguish " any one of them. There are then certainly " in the Air many Sounds which we do not " hear; fuch as, for inftance, the Noife of a ٠٢ Silk-Worm gnawing a Mulberry Leaf; if he ٠٢ is alone, or there are but few of them to-" gether, no body can hear them: but put a " a certain Number of them in a Cabinet, and " then all those little Noises joined in unifon, " become mighty fenfible to our Ears. How " much more is it possible, that there may be " in the Water Noifes infenfible to us, and that " Fishes may by that means speak, without " being Н

" being audible to us : at least I delight in "thinking fo, not to rob any part of the Creation of those Perfections which Nature uses "to beftow on all : nor could I think, without a kind of philosophical Melancholy, "that she had doomed to eternal Silence, innumerable Nations, which inhabit the Immensity of the Seas and Rivers. Silence is the Portion of the Dead; Speaking enlivens the Living themselves. You may laugh, and be as merry as you please upon my speaking Fish, as doubtless he was laughed at that first mentioned a flying Fish, and yet the one may chance to prove as true as the "other.

" The Reptiles and Infects are just in the " fame Cafe. There are many kinds of Rep-" tiles which have very distinct vocal Ex-" preffions; fuch as Serpents, Frogs, and Toads : " and confequently, arguing upon the Principle " of the Uniformity of Nature, we are inti-" tled to suppose an Equivalent in the rest; " not to mention supplemental Miens, Looks, " and Geftures. It is not quite fo with the " Infects : there is no Species of them, that we " know of, that has vocal Expression, pro-" perly fo called : The Cry of the Cricket, the " finging or chirping of the Grashopper, the " Noife of certain Butterflies, and the hum-" ming of Flies, are not properly vocal Sounds, " but Noifes caufed by the trembling of a " Membrane. But what of all that? It can-" not be doubted, but that the Cry of the " Cricket

" Cricket and Graſhopper, ſerves them to call "each other in order to meet, and, very like-"ly, to converſe. It may be thought that the "humming of the Flies likewiſe ſerves them "to know each other in every Society, either "by the Uniformity or Uniſon of the Tone, "or imperceptible Differences not within our "reach, which may be equivalent to vocal Expreflions, and is at the fame time a Proof, how "Nature, always uniform as to what is gene-"ral and effential, is, at the fame time, ingeni-"ous in varying the Means and Particulars of "of her own Productions. Now, what Nature "has done for fome Infects, fhe has certainly "done for all.

" There is, for instance, a particular Sort of " Spiders, which have a very fingular Method " of testifying to each other their Defire of " being together. The Spider that wants Com-" pany, ftrikes, with I know not what Inftru-" ment, against the Wall or Wood where she " has fettled, nine or ten gentle Blows, nearly " like the Vibrations of a Watch, (which there-" fore the Ignorant and Superstitious call a Death-" watch) but a little louder and quicker ; after " which the stays for an Answer : if the hears " none, the repeats the fame by Intervals for " about an Hour or two, refuming this Exer-" cife, and refting alternately Night and Day. " After two or three Days, if the hears no-" thing, the changes her Habitation, till the " finds one that answers her. It is another Spi-" der that answers her exactly in the same man-" ner, H 2

" ner, and, as it were, by Echo. If the lat-" ter likes the Proposal, the Conversation grows " brifker, and the beating becomes more fre-" quent. Give attention to it, and you will " find by the Noife that they gradually ap-" proach each other, and that the Beatings " come at last fo close, that they are confound-" ed, after which you hear no more Noife; " very likely the reft of the Conversation is " whifper'd. I have oftentimes amufed my-" felf in making the Echo of a Spider. " which I have heard beating, and whofe " Noife I imitated, and the answered me punc-" tually; fhe fometimes even attacked me, and " began the Conversation : I have often given " that Diversion to several People, and made " them believe it was a familiar Spirit.

" How many like Discoveries might we make " upon Infects, if our Organs were delicate " enough to fee and perceive their Airs and " Motions, to hear their Voices, or what Nature " has allotted them inftead of Voices, I make " no doubt, but we should find in Ants, Bees, "Worms, Scarabæus's, Caterpillars, Palmer-" worms, Mites, and all the Infects, a Language " defigned for their Prefervation, and the fup-" ply of their Wants. And as there are certain " Species of Infects, in which we observe great-" er Industry and Knowlege than in large Ani-" mals, it is not improbable that they have like-" wife a more perfect Language in proportion, " always confined however to the Necessaries of " Life."

Thus far I have transcribed almost intirely from the ingenious Author, who upon this Head talks more like a Philosopher, than in any other part of his Work. But were we now to enter into a minute Examination of the various Labours, the indefatigable Application, the publick Spirit, the regular Policy, the exact Oeconomy of the feveral Families of Infects, Bees, Ants and Wafps in particular, of which you find most surprizing Accounts in Spectacle de la Nature, and other learned Writers, it would be very hard to account for them, any otherwife than by allowing fome mutual Means of Communication betwixt the Individuals of each Society, which we may venture to call a Language, or fomething analogous to it; and why should we be afraid of allowing this, when we confider, that even the most inarticulate Sounds are a kind of Language to fome part of the Creation or other; nay, I may venture to add, even to ourfelves. Do not the Drum and Trumpet fpeak to the Soldier? Does not every mufical Sound speak to some part of our Nature? How are we excited by fome to martial Rage and Fury, foften'd by others into jovial Mirth and Pleafures and diffolute Luxury; and melted by others into the tendereft Sentiments of Pity and Compaffion, and fometimes even into Tears? Nay, the most discordant and grating Sounds have a Power over us; they make difagreeable Impressions, and excite painful Sensations in us; they difcompose and diffipate the Spirits, they feem to curdle the Blood, like Acids thrown into Milk.

Milk, they enfeeble the whole nervous System, they fpread a Trembling through our Joints. and Paleness over our Faces, and make the stouteft Heart to tremble. Mr. Collier, has fomewhere in his Effays, carried this Thought fo far as to fancy, that such a Concert of discordant Sounds, or Anti-music, might be composed, as should fink the Spirits, shake the Nerves, curdle the Blood, and infpire Despair, Cowardice, and Confternation into all that hear it. 'Tis probable (fays he, Part II. page 24.) that the roaring of Lions, the warbling of Cats and Screech-Owls, together with a Minture of the bowling of Dogs, (to which I could add fome other Sounds. which I tremble to think of ) judiciously imitated and compounded, might go a great way in this Invention : And proposes it as a very ufeful Improvement for the military Service, to strike a Terror and Panic into an Enemy; not confidering, that the Performers in this infernal Concert, and their Friends about them, would be in more Danger than the Enemy, who would be further removed from the difcordant Sounds, and confequently from the terrible Impression .--- This by-the-bye.--- But in general we may venture to affirm with the Apofile, That among it that almost infinite Variety of Sounds and Voices that are to be heard thro' the whole Creation, there is not so much as one without its Signification. 1 Cor. xiv. 10.

Well! Madam, thus far, I think, our Author and we are pretty well agreed, that Brutes have Understanding to know and express their Wants,

Digitized by Google

Wants, and provide for their Necessities; and a Language, or fomething equivalent to it, to demand and give mutual Advice and Affistance. Here, I think, we must make a Stand, we can go no further : their Language, however known to them, is quite unknown to us; but could we converse with them in their own Language, as our renown'd and ingenious Countryman Capt. Lemuel Gulliver did with the Nation of the Houbynnims, we might then perhaps have Reafon to agree with him, that they think and act more rationally, have more Senfe, more Honour, and more Virtue, are better Philosophers, and deeper Politicians, than fome of the fineft Folks in Great Britain.—The only Difference now between us is, how to account for these furprizing Faculties, that they are not the Effects of mere Matter and Motion; that they valtly exceed all the Powers of Mechanism, he readity confesses, and so I think must you and L But spiritual Powers and Faculties, without a fpiritual Subject to which they belong, and in which they refide, is a flocking Abfurdity. Well, and how does he get rid of this Difficulty? You shall hear him, Madam, in his own Words, Page 10. Reason (lays he) naturally inclines us to believe that Beafts bave a fpiritual Soul; and the only thing that oppofes this Sentiment, is the Confequences that might be inferred from it. If Brutes have a Soul, that Soul must be either Matter or Spirit, it must be one of the two; and yet you dare affirm neither. You dare not fay it is Matter, because you

you must then necessarily suppose Matter to be capable of Thinking; nor will you fay that it is Spirit, this Opinion bringing with it Consequences contrary to the Principles of Religion; and this among others, that Men would differ from Beafts, only by the Degrees of Plus and Minus, which would demolify the very Foundations of all Religion. Therefore, if I can elude all these Consequences, if I can affign to Beafts a spiritual Soul, without striking at the Doctrines of Religion, it is evident that my System, being moreover the most agreeable to Reason, is the only warrantable Hypothefis. Now I shall, and can do it with the greatest Ease imaginable. I even have means, by the same Method, to explain many very obfcure Paffages in the Holy Scripture, and to refolve some very great Difficulties, which are not well confuted. This we shall unfold in a more particular Manner.

And, in good truth, Madam, you will find the Matter as particular as the Manner. An Hypothesis, so wild and unphilosophical, so contrary to Reafon and Scripture, fo flocking to common Senfe, delivered with fuch an affuming Air, and fuch dogmatical Language, could furely proceed from nothing but an Excess of Vanity, or Contempt of his fine Lady's Understanding. But I shall detain you from it no longer, but give you as fhort and plain a View of it as I can; and, as near as possible, in his own Words.

Page 11. Religion teaches us, that the Devils, from the very Moment they had finned, were reprobate, and that they were doomed to burn for ever

3

ever in Hell; but the Church has not as yet determined whether they do actually endure the Torments to which they are condemned: it may then be thought they do not yet suffer them, and that the Execution of the Verdiet brought against them is referved for the Day of the final Judgment -Page 13. Now what I pretend to infer from bence is, that till Doom's-day comes, God, in order not. to fuffer so many Legions of reprobate Spirits to be of no use, has distributed them thro the several Spaces of the World, to ferve the Defigns of his Providence, and make his Omnipotence to appear. Some continuing in their natural State, bujy themselves in tempting Men, in seducing and tormenting them, either immediately, as Job's Devil, and those that lay hold on human Bodies, or by the ministry of Sorcerers or Phantoms. These wicked Spirits are those whom the Scripture calls the Powers of Darkness, or the Powers of the Air. God, with the others, makes Millions of Beafts of all kinds, which ferve for the feveral Ujes of Man, which fill the Univer je, and caufe the Wisdom and Omnipotence of the Creator to be admired : By that means I can eafily conceive how, on the one hand, the Devils can tempt-us; and on the other, how Beafts can think, know, bave Sentiments, and a spiritual Soul, without any way firiking at the Doctrines of Religion. I am no longer furprized to fee them bave Dexterity, Forecast, Memory, and Judgment. I should rather have occasion to wonder at their baving no more, fince their Soul, very lik ly, is more perfect than ours : But I discover the Reason of this, it is because in Beasts as well as in qur

our felves, the Operations of the Mind are dependent on the material Organs of the Machine to which it is united; and these Organs being groffer and lefs perfect in Beasts than in us, it follows, that the Knowledge, the Thoughts, and the other spiritual Operations of Beasts, must of courje be less perfect than ours : and if these proud Spirits know their own difmal State, what an Humiliation must it be to them, thus to see themselves reduced to the Condition of Beafts! But whether they know it or no, fo shameful a Degradation is still with regard to them, that primary Effect of the divine Vengeance 1 just mention'd, it is an anticipated Hell. P. 17. Having mentioned the Prejudices againg this Hypothefis, fuch as particularly the Pleafure which People of Senje and Religion take in. Beasts and Birds, especially all sorts of Domeflick Animals; he proceeds : Do we love Beafts for their own fakes? No. As they are altogether Strangers to human Society, they can have no other Appointment, but that of being ufeful and amufing. And what care we, whether it be a Devil, or any other Creature, that ferves and amules us? The thought of it, far from flocking, pleases me mightily. I with Gratitude admire the Goodness of the Creator, who gave me too many little Devils to ferve and amufe me. If I am told, that these poor Devils are doomed to fuffer eternal Tortures, I admire God's Decrees, but I have no manner of share in this dreadful Sentence; I leave the Execution of it to the Sovereign Judge, and notwithstanding this, I live with my little Devils, as I do with a Multitude titude of People, of whom Religion informs me, that a great Number shall be damned. But the cure of a Prejudice is not to be effected in a Moment, it is done by Time and Reflection; give me leave then lightly to touch upon this Difficulty, in order to observe a very important Thing to you.

Perfuaded as we are, that Beasts have Intelligence, have we not all of us a thousand times pitied them for the exceptive Evils, which the majority of them are exposed to, and in reality fuffer? How unhappy is the Condition of Horfes, we are apt to fay, jeeing a Horfe whom an unmercifal Carman is murdering with Blows! How miserable is a Dog whom they are breaking for Hunting ! How difinal is the Fate of Beafts living in Woods, they are perpetually exposed to the Injuries of the Weather, always feized with Apprehensions of becoming the Prey of Hunters, or of some wilder Animal, for ever obliged, after long Fatigue, to look out for some poor insipid Food, often fuffering cruel Hunger, and fubject moreover to Illness and Death ! If Men are subject to a multitude of Miseries that overwhelm them, Religion acquaints us with the reason of it, viz. their being born Sinners : but what Crimes can Beasts have committed, by Birth to be subject to Evils fo very cruel? What are we then to think (p. 19.) of the horrible Exceffes of Miferies undergone by Beafts: Miferies indeed, far greater than those of Men? This is in any other Syfem an incomprehensible Mystery; whereas nothing is more easy to be conceived from the System I propose. The rebellious Spirits deserve a Pumishment still more rigorous, and happy is it for t hem I 2

them that their Punishment is deferred; in a word, God's Goodness is vindicated, Man himjelf is justified: for what Right can we have without Necessity, and often in the way of meer Diversion, to take away the Life of Millions of Beasts, if God had not authorized him so to do? And Beasts being as sensible as our selves of Pain and Death, how could a just and merciful God have given Man that Privilege, if they were not so many guilty Victims of the Divine Vengeance?

But hear still something more convincing, and of greater Consequence : Beasts, by Nature, are extremely Vicious. We know well that they never fin, becaufe they are not free; but this is the only Condition wanting to make them Sinners. The Voracious Birds and Beasts of Prey are cruel: Many Infects of one and the fame Species devour each other. Cats are perfidious and ungrateful, Monkeys are mischievous, Dogs are envious. All Beasts in general are jealous and revengeful to exce/s; not to mention many other Vices we obferve in them; and at the fame time that they are by Nature jo very vicious, they have, fay sve, neither the liberty, nor any helps to refift the Byass that hurries them into so many bad They are, according to the Schools, ne-Actions. ceffitated to do Evil, to disconcert the general Order, to commit whatever is in Nature most contrary to the Notion we have of natural Justice, and to the Principles of Virtue. What Monfters are these, in a World originally created for Order -and Justice to reign in? This is in good part what formerly perfuaded the Manicheans, that there were of necessity two Orders of Things, one good,

good, and the other bad; and that Beafts werenot the Work of the good Principle. A monstrous Error ! But how then shall we believe that Beafts came out of the hands of their Creator with Qualities so very strange? If Man is so very wicked and corrupt, it is because he has himfelf through Sin perverted the happy Nature God had given him at his Formation. Of two things then we must say one: either that God has taken delight in making Beasts so vicious as they are, and of giving us in them Models of what is most shameful in the World; or that they have like Man Original Sin, which has perverted their primitive Nature.

The first of these Propositions finds very difficult. access to the Mind, and is an express Contradiction to the Holy Scriptures, which fay, that whatever came out of God's hands, at the time of the Creation of the World, was good, yea very good? What good can there be in a Monkey's being fo very mischievous, a Dog so full of envy, a Cat so malicious? But then many Authors have pretended, that Beafts before Man's Fall were different from what they are now; and that it was in order to punish Man, that they are rendred fo wicked : but this Opinion is a meer Supposition, of which there is not the least Footstep in Holy Scripture. It is a pitiful fubterfuge to elude a real Difficulty; this at most might be faid of the Beasts with whom Man has a sort of Correspondence, but not at all of the Birds, Fishes, and Infects, which have no manner of relation to him. We must then have recourse to the second Proposition, That the Nature of Beasts has, like that of Man

Man, been corrupted by fome original Sin: Another Hypothefis void of Foundation, and equally inconfiftent with Reafon and Religion, in all the Systems which have been bitherto esponsed concerning the Soul of Beasts. What party are we to take? Why, admit of my System and all is explained. The Souls of Beasts are refractory Spirits, which have made themselves guilty towards. God. The Sin in Beasts is no original Sin, it is a personal Crime, which has corrupted and perverted their Nature in its whole Substance; hence all the Vices and Corruption we observe in them, tho' they can be no longer criminal; because God by irrecoverably reprobating them, has at the same time divested them of their Liberty.

You have here, Madam, a full View of our Author's Hypothefis, the reft being nothing but flourish and trifle, idle Answers to idle Objections, upon a Supposition that his Scheme is demonstrably certain. And is it not a choice one. to answer so many Purposes, and solve so many Difficulties in Philosophy and Scripture, and reconcile fo many apparent Contradictions in Reafon and Religion ! Does not your very Heart recoil at the monstrous Thought? Can you view it in any Light without Abhorrence and Averfion. It was a just Cenfure of a very great Man upon Descartes's Philosophy, that if he were at a loss for Reasons to oppose his Doctrine, that Brutes were mere Machines, this alone would be a fufficient Proof to himfelf, that it was making a Jest of so great a part of the Creation : but this Author has exceeded him with a Vengeance I Instead of making a Jest, he bas made them Devils : **,**``

will; and in the Management of his Argument there is fuch a Confusion of Sentiments, fuch a lumble of Light and Darkness, Truth and Error, Reafon and Imagination, that one knows not where to begin, or in what Order to proceed, how to difentangle Truth from Error, to feparate the Precious from the Vile, to diffinguish the cool Dictates of Reafon and Philosophy, from the wild Flights of Imagination and Fancy. To follow him through all his Excursions, would be an endless and useless Undertaking. Our best and thortest way will be to examine the Goodness of the Foundation, and fee whether there be any Ground in Scripture or Reason to support lo monstrous a Superstructure ; if not, it must fall to the ground, and leave room for a just and uniform Structure upon folid and lafting Foundations; which, (if you approve of this) shall be the Subject of a fecond Letter.

In the mean time, Madam, I affure myfelf, you will be in no pain about the Event. You are too well acquainted with the Language and Gepius of that lively Nation, as not to know that they have Galconades in Philosophy, as well as in Gallantry, Romance, and Politics: You are bleffed -with an Understanding too good to be imposed upon by vain Pretences to Reafon and Philosophy; you can early diffinguish betwise empty Sounds, and folid Senfe; herwist the wanton Sallies of a luxuriant Fancy, and the fevere Conclusions of Truth and Justice. You have a Firmness of Mind too great to be mov'd by the vain Terrors of a frighted Imagination, which are too often the Curle of weak and little Minds. Continue, therefore.

fore, your wonted Care and Affection for your innocent Domesticks; they look up to you for their Support ; from your Hand they receive the flender Provisions of Life, without murmuring or repining, which they endeavour to repay with the fincereft Gratitude, the most faithful Services, and unfeigned Affections that their Natures are capable of: If you are pleafed, they rejoice with you; Do you carefs them? They are transported with Pleasure. Do you frown? They tremble, Do you chide or punish them? They endeavour to appeale you by the most humble Prostration and Submillion. Do not many of them discover more Gratitude, Sincerity, nay, I had almost faid Virtue, than many of their Masters, who value themfelves upon the Refinements, upon their Reafon, the Improvements of their Understandings, and nice Sense of Honour? Are they wretched as well as we? Are they exposed with us to the unavoidable Calamities of Life? They are not wretched through their own faults, they are not the Authors of their own Misery; they (as well as we) are made subject to Vanity, but they not willingly, by a voluntary Abuse of their proper Faculties, but are by a Neceffity of Nature involv'd in the Guilt and Condemnation of their rebellious, attainted, natural Lord and Sovereign. Rom. viii. 20.

If you are not difpleafed with the Subject, tired with the Length, or difgusted with the manner of this tedious Epistle, I shall quickly do myshelf the Honour to fend you fome further Considerations upon the same Subject. I am, with great Respect, Madam,

Your most humble Servant.

# FREE, THOUGHTS UPON THE BRUTE-CREATION: OR, AN OR, AN EXAMINATION OF Father BOUGEANT'S Philosophical Amusement, &cc: LETTER II.

(Price Eighteen Pence.)

## The following Treatifes wrote by J. Het prop, A. M. Printed for R. MINORS.

I. A Proposal for bringing in a Bill to repeal certain obsolete Statutes, called the Ten Commonaments. Price 15.

11. The Contempt of the Clergy. In a Letter to a Friend. Price 2.3. 62.

JAI. An Effay for the bester Ragelation and Imp provement of Free-Binking. Blied Li.

IV. An Effay on Honour. Price 15. 6d.

V. A Commentary upon the fecond Pfain, is 6d.

#### 0 R,

An EXAMINATION of Father BOUGEANT's Philosophical Amusement, &c.

#### LETTER II.

Mаdам,

YOUR favourable Acceptance of my first Letter, encourages me to hope you will not be displeased with a second; in which I propose to confider more distinctly the Question before us. I shall view it in every Light that Revelation and Reason can give us. I shall confider the Account that Moses gives of their first Formation, and original State in Paradise, and compare it with their present State and Condition in the World; B

Digitized by GOOS

from whence I shall draw fome Inferences and Conclusions, and endeavour to answer fome Objections; and leave it to your own good Judgment to determine upon the Evidence that shall be given.

The Apostle to the Hebreivs, xi. 2. tells us, that by Faith we understand that the things which are feen (this whole visible World, with all its various Inhabitants and Productions) were made out of things which are not seen, (an ideal, invisible, glorious World, eternally subfifting in the Divine Mind) that this prefent temporary, fading State of things, which we call the natural World, is an Out-birth, a creaturely Manifestation of the invisible Powers and Beauties of eternal Nature, impreffing and difplaying themfelves through all the Regions of created Nature, through all the - Tribes and Families of the Animal, Vegetable, and Mineral Kingdoms, and to which they exactly correspond, as the Shadow to the Substance, and the Impression to the Soul. From this fruitful Womb of eternal Nature were produced in their appointed Seafon, by the infinite Wildom, Goodnels, and Power of the Almighty, the whole Mundane System, the World with all its Inhabitants, all the Subjects of the Animal and Vegetable Kingdoms, all the innumerable Species, Tribes, and Families of Birds, Beafts, and Fifnes, Reptiles, and Infects, all that live upon the Earth, fly through the Air, or fport themselves in the great Abyss, from Behemoth and Leviathan to the

the fmalleft Infect : the very leaft and meaneft, as well as the greatest, are all the Work of God, formed by infinite Wildom and Power upon the perfect ideal Models in the Diving Mind. Moles describes the Creation or Formation of the Fishes and Fowls out of the Waters as the Work of the Fourth Day. Gen, 20, 21, 22. God faid, Let the Waters bring **i**. forth abundantly, the moving Creature that hath Life, or (as it is more truly rendered in the Margin) a Soul; and Fowls that may fly above. the Earth, in the open Firmament of Heaven; and God created great Whales, and every living Creature that moveth, which the Waters brought. forth abundantly after their kind, and every winged Fowl after his kind, and God faw that it was good. The Beafts and Reptiles as produced out of the Earth, were the Work of the Fifth Day, ver. 24. And God Jaid, Let the Earth bring forth the living Creature after his kind, Cattle and Creeping Thing, and Beast of the Earth after his kind, and it was lo. And God made the Beast of the earth after his kind, and Cattle after their kind, and every thing that creepeth upon the earth after his kind : and God Jaw that it was good. They were all pronounced to be good, yea, very good, being the Productions of infinite Wildom and Goodnels, formed in Member, Weight, and Measure, of the most exquisite Beauty, the most delicate Proportion, without Defect, without Superfluity, exactly fitted and enabled to answer the various Purpoles of their Creation, to B 2 execute

Digitized by GOOS

execute the Will of their Creator, to minifler to the Delight and Service of Man, and contribute to the Beauty and Harmony of the universal System. These, therefore, were the first Inhabitants of Paradife, in which they were fettled by their Maker with a fpecial Bleffing to increase and multiply their Species, in the feveral Regions of Nature, appointed for their Habitation. We may confider them as the numerous Domesticks of fome great and mighty Prince, fent beforehand to fill, adorn, and beautify the feveral Offices and Apartments of his Court, and give him a magnificent and triumphant Reception. Accordingly we find, that fo foon as Man was created in the Image of God, ver. 26, 27. God gave him an absolute Power and Dominion over them all. He bleffed them, and faid unto them, Be fruitful and multiply, and replenish the earth and subdue it, and have dominion over the Fish of the fea, and over the Fowl of the air. and over every Living Thing that moveth upon the earth. As Man was thus created in the Image of the Ever-Bleffed Trinity, all the Excellencies and Perfections that were to be found in every Species of Animals in their most perfect State, were all in a fuper-eminent degree in the perfect human Nature, thereby our first Parent had an intire Knowledge, and absolute Dominion over all the various Kinds, Ranks, and Orders of the animal and vegetable World. By the first he was enabled to know the very central Natures, and most intimate Properties Properties and Powers of every Species, and to give them fignificant Names, expressive of their feveral Natures. Thus we read, Gen. ii. 19. And out of the Ground the Lord God formed every Beaft of the field, and every Fowl of the air, and brought them unto Adam to fee what he would call them ; and what soever Adam called every living Creature, that was the Name The Original of all Names was to thereof. express the Nature of the Things named, upon which account Names and Natures were very frequently in Scripture used promiscuously. And as he perfectly knew their feveral Properties and Powers, and had them all in a fupereminent degree within himfelf, fo he had an absolute Power to direct and controul them, fo as to fulfil the Will of their Creator, in anfwering the End of their Creation, and preferving the Peace and Harmony of the whole System. Whilst they received through him as Gode Vicegerent, and their Governour, fuch Communications of Happiness, as their Nature was capable of, and their State of Being required. He was their immediate Lord, receiving from the infinite Fountain of Light and Good a conftant uninterrupted Communication of Life and Bleffing, which were through him derived to all the feveral Parts and Inhabitants of the Animal and Vegetable Creation, and thereby kept them all in abfolute Subjection and Dependance upon him; fo that he had an intire Dominion over this whole visible World which we inhabit. To this Original 5

ginal Charter or Commission the holy Pfalmist refers, P/al. viii. 4, 5, 6, 7, 8. Lord, what is Man that thou art mindful of him, and the Son of Man that thou visites him? Thou mades him lower than the Angels, to crown him with Glory and Worship; Thou madest him to have dominion over the Works of thy Hands, thou has put all things in subjection under his feet, all Sheep and Oxen, yea and the Beasts of the Field, the Fowls of the Air, and the Fishes of the Sea, and what sever walket horough the Paths of the Sea.

Here, Madam, let us make a stand, and review with Aftonishment and Rapture the infinite Wildom, Power, and Goodnels of our Almighty Creator, the transcendent and inconceiveable Beauties of the new World, the Harmony, the Peace and Happiness of thefe its once happy Inhabitants, bleffed with more exalted Faculties, Strength and Beauty, cropping the everlasting Verdure, the unfading Flowers of Paradife, drinking the untainted Streams of Life and Immortality in a delicious, Garden, into which neither Sin nor Sorrow, Corruption or Death had yet entered, exempt from Pain and Sickness, Labour and Mifery, where the Spirits of Darkness had no Power, nor the least Appearance or Shadow of Eyil could find admiffion; where all was Purity, Light, and Pleasure, the Joys and Beauties of eternal Spring ; where each of them in their proper Place and Order were miniftring to the Happiness of their Sovereign Lord, •

Is there any thing in this Account that feems either impossible or improbable? Does not the whole appear confistent, reasonable, worthy of God, and agreeable to Scripture? On the other hand, how mean, how trifling, how unworthy of God, how repugnant to Scripture, is the Philosophy of those, who suppose them to be either animated by Evil Spirits, or elfe allowing them no fpiritual Principle of Motion or Action, suppose them to be mere Machines, to have no more Senfe or Perception than a Clock, or a Watch; that though they have fome Motion, fome Appearance of Senfe and Shadow of Reason, yet it is no more than what arifes from the Structure of their Organs, and the Mechanism of their Frame; that they are therefore no more the Objects of our Compaffion than any other Piece of Machinery, That their Cries and Complaints, which we commonly fancy to be Expressions of Grief, Pain, or Suffering, are no more to be regarded than the Sound of a Drum when it is beaten, or the Noife of a Clock when it ftrikes. Is not this offering Violence to Reafon, Nature, and common Senfe? Is it not making a Mock of God's Creatures? Sure I am, that the Scriptures and most ancient Philosophy' treat this Subject in

in a very different manner. Moles declares in the most express manner, that they have living Souls; Gen. i. 29, 30. And God faid, Bebold I have given you every Herb bearing Seed, which is upon the face of all the Earth, and every Tree. in which is the Fruit of a Tree, yielding Seed, to you it shall be for Meat. And to every Beast of the Earth, and to every Fowl of the Air, and to every Thing that creepeth upon the Earth, wherein there is Life, or (as it ought to be rendered, as in the Margin, a living Soul) I bave given every green Herb for Meat. On this account it is, that the Scriptures every where represent them as Objects of the divine Care and Compassion, as depending upon him for the Support and Suftenance of that Life which he has given them. Hence holy Job xxxiii. 41. asks this Question, Who provideth for the Raven his Fcod? when his young ones cry unto God, they wander for lack of Meat. The Plalmist has the same Expression, Plal. cxlvii. 9. That God giveth Fodder to the Cattle, and feedeth the young Ravens when they call upon bim. So again, Pfal. civ. speaking of the whole Brute-Creation, he fays, Thefe wait all upon thee, that thou mayst give them their Meat in due Seafon; when thou giveft it them, they gather it; when thou openeft thy Hand, they are filled with good. Our bleffed Lord fays the fame thing, Mat. vi. 26. Behold the Fowls of the Air, for they fow not, neither do they fpin, and yet your Heavenly Father feedeth them. And in the Levitical Law, God feems to affert his peculiar

peculiar Title to every Species, and their Relation to him, by claiming the First-born of each, as peculiarly his own. Thus we read Exod. xiii. 12. The Lord spake unto Moses, faying, Sanctify to me all the First-born among the Children of Israel, both of Man and Beast, it is mine. And Pfal. cxviii. where all Creatures are called upon to praise God, Beasts and all Cattle, Worms, and feathered Fowl. It will be found to have a much more exalted Meaning, than appears at first Sight to an unattentive Reader.

But now I expect to be asked, if this were the original happy State of the Brute-Creation, how came they to lofe it, how came they into this miferable Condition in which we fee them at prefent? A God of infinite Wifdom and Goodness could make none of his Creatures to be miferable; much lefs would he, by an arbitrary Act of his Will and Pleafure, deprive them of any kind or degree of Happinefs, which his Goodnefs had freely conferred upon them, without any Offence or Demerit on their parts. They are not properly moral Agents, no Command or Prohibition had ever been given them; and where there was no Law, there could be no Transgreffion; and where there was no Tranfgreffion, one would naturally imagine there would be no Punishment. And yet there seems to be an univerfal Sentence of Condemnation gone out against the whole System. They suffer in every Article of their Nature in fuch a manner,

manner, as one would think nothing but fome univerfal Guilt, and intire Corruption and Degeneracy of their Nature could poffibly deferve or bring upon them. How elfe comes it to país, that there should be in some of them such a Malignity and Cruelty of Temper, and in others fuch poisonous Qualities, or fuch hideous Deformity as is quite shocking and terrible to human Nature? But the most beautiful and harmlefs, even those whom we confider as the Emblems of unspotted Innocence, as Lambs and Doves are exposed to the fame Calamities, of Misery, Pain, Corruption and Death, as those of the most favage and cruel Natures. Now it is as plain, from Reason and the Nature of Things, that these malignant Qualities are not effential to them, were not originally implanted in them at their first Creation, as that from an absolutely good and perfect Caufe no Evil could proceed: And the Scriptures declare that God pronounced them all to be good, yea very good: Endued with every Perfection, that their Nature and Rank in the Scale of Beings required. Whence then this deplorable Change? this unhappy Subversion of their primitive State, their prefent lamentable Condition !

I have already told you, that their Happinefs confifted in the Communications of divine Bleffings, which were conveyed to them through the pure Canal of the unfallen human Nature. Our first Parent in his State of Innocence and Glory, stood in the place of God to

to the World below him, cloathed with all the Beauties, and Bleffings of Paradile; the created Image of the ever-bleffed Trinity; through him were derived all the Bleffings of that happy State, to all the different Species, Tribes and Families of the animal Creation. This was the happy State of the primitive Earth and all its Inhabitants, till Man by his Transgreffion loft the Favour of his Maker, and forfeited both for us and them the bleffed Privileges of our primitive State and Condition; the Communication of divine Light and Life betwixt God and Man being fuspended, he had no more Power to direct and govern the Creatures below him. He ftood naked and destitute, poor and helples in the midst of his numberless unhappy Subjects and Domesticks, utterly unable to affift or deliver himfelf or them from the Bondage of Corruption he had brought upon them, he being by his own Act and Deed devoted to Darkness and Death, neceffarily involved the whole System in the fame Calamity. The Centre of Bleffing was fhut up from him, or rather he had shut himfelf out of it; His Eyes were closed to the Light of Heaven, and all the Sources and Channels of divine Communications were intirely interrupted; He had no Bleffing to receive, and therefore none to beftow. He was fallen under the Influences of the aftral World, confined as a Malefactor to a Prison of his own making, to be fcourged and punished by the jarring difcordant Properties of the divided C 2

vided Elements, to which he had voluntarily fubjected himself; no wonder, therefore that the whole System of Creatures below him, who were his Subjects, Domesticks, and Dependants, are deeply affected by his Fall, and thare in his Punishments. So the Apostle to the Romans tells, Chap. viii. That the Creature. (the whole Creation) was made subject to Vanity, not willingly (not by any Fault of their own) but by reason (on the Account, by the Sin) of him, who hath subjected the same in hope; that is, of Adam, who was their immediate Lord and Governour. For we know that the whole Creation groans and travels in Pain. The whole System of the visible Creation sympathizes and fuffers with their rebellious Lord. Thus when a great Subject is attainted of High Treason against his Sovereign, the Sentence affects not only himfelf, but his Children and Domesticks; and an intire Forfeiture of all the Privileges of his Blood and Birth, are the certain and neceffary Confequences of his Condemnation: So that as Man was by his Transgreffion devoted to Darkness and Death, fo were all the Brute-Creation, who were his Domefticks and Depen-Though it was not indeed fo properdants. ly a judicial Sentence pronounced upon them, as a neceffary Confequence of their State in Nature, and the Relation and Dependance which they flood in to our first Parent their natural Lord and Sovereign. They were by his Transgreffion made subject to Vanity, Mifery,

fery, and Death, but no violent Execution was fuffered to be made upon them, but in the way of Sacrifice; none of them were to be out to death, but by God's own Appointment to be Types and Monitors of the great propitiatory Sacrifice of the Lamb of God, who was flain from the Foundation of the World for the Salvation and Redemption of loft Mankind. No Power was given to Man to murder or abufe them, to kill or eat them, as we have now, that was a particular Indulgence granted to Man after the Flood, which had to broken and corrupted the Face of Nature, weakened and deftroyed the vegetable Powers and feminal Principles of the Earth, that the Herbs and Fruits had, in a great meafure, loft their natural Temperature, and were lefs capable of nourishing the Bodies of Men. upon which God gave them liberty to cat the Flesh of Beasts, Birds, and Fishes, as well as the Fruits of the Earth, as we read Gen, ix. 2, 3. The Fear of you, and the Dread of you, shall be upon every Beaft of the earth, and upon every Fowl of the air, upon all that moveth upon the earth, and upon all the Fishes of the fea; into your hand are they delivered, every moving thing that liveth shall be Meat for you, even as the green Herb, have I given you all things.

The State of the Brute-Creation, therefore, has, ever fince the Fall of Man, been very different from what it was at the first. Some of them are fierce and untractable, preying about

about in defart Places, the Enemies and Deftroyers of Mankind, who yet still confess their original Subjection to them by flying from them, and not affaulting them, unless compelled by Hunger, or in their own Defence : the reft are in a State of Servitude and Subjection, ministring in their proper Place and Order, to the Pleafure and Necessities of Mankind. Upon this view they are represented to us both by Reafon and Revelation, as the unhappy Objects of our Care and Compassion, as guiltless Sufferers for our Transgressions: they declare it to be a Breach of natural Justice, an Indication of a cruel and unnatural Temper to abufe or oppress them, to increase the Miseries, and aggravate the Sufferings of these innocent unhappy Creatures, and to add by our Barbarity to the Weight of that Bondage to which they are made fubject by our Difobedience, to put them to unneceffary Labours, to load them with immederate Burdens, to punish them with immoderate Severities, or withhold from them those necessary Refreshments which their State and Condition requires. The Wife Man in the Book of Proverbs, Ch. xii. 10. makes it an Act of Righteousness, the Dictate of natural Equity: The righteous Man regardeth the Life of his Beast, but the tender Mercies of the Wicked are cruel. Where he plainly declares it to be the Mark and Duty of a righteous Man to be merciful to his Cattle; and the Property of an unjust and wicked Man to be cruel and barbarous. God himfelf in the old

old Law guarded against this unnatural Cruelty by feveral express Commands and Prohibitions in favour of these unhappy Creatures, particularly in the Fourth Commandment, the Reft of the Sabbath-day is declared to be for the Ease and Benefit of the Cattle, as well as for their Owners; as it is more expresly declared, Exod. xxiii, 12. Six days shalt thou do thy work, and on the leventh day thou shalt reft, that thine Ox and thine A/s may reft in the fame. And at the 4th and 5th Verses of the same Chapter, there is a particular Injunction to fnew Mercy even to the Cattle of our Enemy, if we fee them in diftrefs: If thou meet thine Enemies Ox or Afs going aftray, thou shalt furely bring it back to him again. If thou fee the Ass of him that hateth thee, lying under his burden, and wouldst forbear to belp him, thou shalt surely help with him. And our Bleffed Lord himfelf mentions it as a special Act of Humanity and natural Justice, To lead our Oxen and Alles to watering, or if they bappen to fall into a pit, to pull them out, tho' it were on the Sabbath-day, Luke xiv. 5. Math. xii. 11. In the xxvth of Deut. ver. 4. God prescribes a special Law in favour of the Oxen that trod out the Corn, as we now thresh it, that their Mouths should not be muzzled whilft they were at their Labour, but that they might eat as well as work, and enjoy some immediate Fruits of their Labour. We read in the Book of Jonab, that when the Prophet had denounced the Destruction of Nineveh, the King proclaimed a Falt

Fast of three Days for the Cattle as well as for the People, Let neither Man, nor Beaft, Herd, nor Flock, taste any thing; let them not feed, nor drink Water, but let Man and Beaf be covered with Sackcloth, and cry mightily unto God. And at the last Verse of this Prophecy, God declares, that his Compassion for the Cattle, as well as for the People of Nineweb, had diverted the Execution of the Sensence denounced against them. Should I not, (faid he) fpare Nineveh that great City, in which are more than Sixfcore Thousand Persons, that cannot differn betwixt their right Hand and their left, and also much Cattle ? We read Numbers xxii. 28. That the Mouth of Balaam's Afs was miraculoufly opened to upbraid the Cruelty of his Rider, and his barbarous Ufage of a faithful old Servant, that had never ftumbled or fell with him before : Wherefore, fays she, bast thou smitten me these three times? Am not I thine Afs, upon which thou haft ridden ever fince I was thine unto this day, was I ever wont to do fo to thee? And he faid, Nay. And when the angry Prophet juftified his Severity to the poor Beaft, the Angel of the Lord pleaded for the Afs, and condemned the Rider; Wherefore (faid he) bast thou smitten thine Ass these three times? Unless she had turned from me, jurely I fould bave flain thee, and faved ber alive. And they' the reft have not naturally the Power of complaining in Words, yet have they all a Power of expressing their Pains, their Wants, and their Sufferings, which every body understands.

ftands, and which every good-natured Perfon would gladly relieve or prevent.

As for the Malignity observable in many of them, as particularly the Cruelty and Revenge of fome, the Envy and Treachery of others, which the learned Father knows not how to account for, there feems to be, I think, no great difficulty in comprehending it. The Violence offered to the whole System of Nature, by an absolute Violation of the Laws of Harmony, Justice, Truth, and Order, an intire Apoftacy from the fupreme Fountain of Life and Bleffedness, could not fail to produce dreadful Effects in every part of Nature; all those Qualities and Properties in every Species of Being which in their primitive State of Innocence and Glory were as fo many Veffels and Inftruments of Bleffing, were by this unhappy Change, made fo many different Sources and Instruments of Diforder and Confusion, and the more exalted and powerful they were in the original Frame and - Intention of Nature, fo much the more noxious, malignant and destructive they were in their State of Depravity and Corruption; according to that well-known Maxim of Philofophy, That the best things when they are corrupted, became the worft. This will be found to be univerfally true from the highest to the lowest Order of Beings both in Heaven and Earth. The most exalted Seraphims in the Hoft of Heaven, when they left their first Habitation, and fell from their Thrones of Glo-

D

ry,

ry, found their Fall proportionably deeper, and their Malignity and Mifery proportionably greater than those who moved in inferiour and lower Degees of Power and Glory; the higher they were exalted in the Regions of Light and Immortality, the lower they funk in the Abyfs of Darknefs and Death : The exceeding Brightness of their Flame; the Strength of their Love, and the mighty Powers of their Angelick Nature, whilst united to the pure Light and Love of God, became, when feparated from it, those everlasting Chains of Darknefs by which they are bound, and in which they are detained, to the Judgment of the Great Day. The fame may be too justly faid of our felves, of our own Species. Men of mean Condition, low Parts, narrow Mind», and weak Abilities, if they grow corrupt and wicked, they act with low Views, in a narrow Sphere, and confequently are capable of doing less Mischief in the World; but Men of ftrong Parts, exalted Understandings, extenfive Views, and great Abilities, efpecially when affifted and supported by Interest and Power, when they degenerate, when they turn Tyrants, Oppreffors, and Reprobates, they fpread Rapine and Terror, Destruction and Misery all round them. A little Villain may rob an Orchard or a Fishpond, may steal a Sheep or an Horfe, for which the whole World agrees they richly deferve to be hanged, and generally meet with their Fate; but your illustrious R-ues, your Villains of Diffinction, who plunder Provinces

vinces and Kingdoms, who depopulate Countries, who devour or fell whole Nations into Slavery, and fill the face of the Earth with Blood and Defolation; they move in a different Sphere, and defy that Justice, which if not blind to their Crimes, yet is unable to punish them.

And as for your Sex, whom God and Nature have decked with a Profusion of Charms and Graces, to fweeten the Cares, alleviate the Diffreffes, and heighten the Joys of focial Life, if they should ever be fo unhappy as to deviate from the glorious Path of Virtue and Honour, to degenerate from that amiable Simplicity of Life and Purity of Manners, which is their diffinguishing Excellency, their truest Beauty; it is not to be doubted, but their Guilt and Corruption would be proportionable to that tender Senfibility of Heart which is the Beauty and Glory of their uncorrupted Innocence. And however ftrange and incredible it may appear to those who judge of Ages paft by the Virtue and Innocence of the prefent, which no doubt will be a Pattern to fucceeding Generations; yet Hiftorians, Philosophers, Poets, and Painters, have agreed in some Representations of Female Degeneracy, which an innocent well-bred Man who should make an Estimate of the rest of your Sex, from your own unexceptionable fhining Character, would never expect to find but in Romance and Fable. And that the fame Observation founded in the very Nature D 2 of

of Things, runs through every Species of the Animal-Creation, is fo reafonable a Suppofition, as hardly to admit of a Debate. Upon which account it can hardly be doubted, but that those Animals, which in their present State of Degeneracy and Corruption are most shocking, detestable and destructive to human Nature, were in their original State of Perfection, most eminently useful, beautiful, and good: and by the fame way of reafoning one would be tempted to imagine, that those Species of Animals who feem to be the most uncorrupt Part of the Brute-Creation, who feem to have the least Symptoms of the universal Malignity which has more or less poifoned the whole System, whom Religion and Philosophy represent to us as the most perfect created Emblems of human Virtue and Innocence; I mean the focial and domeftic Animals, those which contribute to the Comforts and Neceffities of Life; as Sheep and Oxen, Doves and Bees, &c. were in their original State, little more exalted in the Perfection of their Natures, than we fee them at. present.

I have often been tempted to indulge an Imagination, that in the original Frame of Things, every Species of Animals were in a more particular and immedite Manner related or united to fome one particular Part, or Power, or Faculty of human Nature, which might be as it were their particular Element, and in which they might most eminently difplay

play and exercise their specifick Virtues and Powers, as Instruments, Emblems, or Unifons in the universal Harmony of Nature, This, Madam, is a mere Conjecture; we pretend not to Demonstration, but when we quit the Land of Systems, to wander in the fpacious Fields of Imagination and Probability, many a beautiful Thought, many an entertaining Conjecture will prefent it felf to a lively Fancy, not unworthy the Attention of a wife Man, or the Confideration of a Philofopher.----One thing however is certain, that in their prefent State of Degeneracy and Corruption, the very worft of them, are but feeble Shadows, faint Emblems, of the fame kind of Degeneracy and Corruption in our felves, in corrupt human Nature. Shew me any one Species of Animals more ridiculous, more contemptible, more pernicious, more deteftable than are to be found among the filly, the vicious, the wicked part of Mankind, Can Apes and Monkeys be a more ridiculous or mischievous kind of Creatures, than some very fine Folks who are to be found in the most police Assemblies? Is a poor Dog with four Legs, who acts agreeably to his Nature, half fo defpicable a Creature as a fad Dog with two, who with high Pretentions to Reafon, Virtue and Honour, is every day guilty of fuch Crimes, for which his Brother-Brute would deferve to be hanged? Is a Swine that wallows in the Mire, half fo contemptible an Animal, as the Drunkard and the Sot, who wallow

wallow in the Filth and Vomit of their own Intemperance? What is the Rage of Tygers. the Fierceness of Lions, the Cruelty of Wolves and Bears, the Treachery of Cats and Monkeys, and the Cunning of Foxes, when compared with the Cruelty, the Treachery, the Barbarity of Mankind? The Wolf and the Tyger that worry a few innocent Sheep, purely to fatisfy their Hunger, are harmlefs Animals when compared with the Rage and Fury of Conquerors, the Barbarity and Cruelty of Tyrants and Oppreffors, who uninjured, unprovoked, lay whole Kingdoms waste, turn the most beautiful Cities into ruinous Heaps, fill every Place with the dreadful Effects of lawless Rage, and sweep the face of the Earth before them like a devouring Fire or an Inundation; and all this only to gratify an infatiable Avarice and Ambition, to extend their, Conquests, to raise an empty Name, a Fabrick of Vanity upon the Ruins of Humanity, Virtue and Honour. Befides, the very fiercest and cruelleft Brutes never prey upon one another; whatever Violence they may offer to. those of a different Species, which they never do, unless compelled by Hunger or in their own defence, yet they fpare one another; whilft Man, the Lord of the Creation, diftinguished from every Species of Animals below him by the glorious Privilege of a rational and intelligent Nature, is worfe than a Brute to his own Species: Not only every Rank and Order of Men are in a State of Enmity

mity to each other, but even those of the fame Rank and Order, who are united not only by one common Nature, but by one common Interest, are as so many Beasts of Prey to each other. Every Man who is under the Dominion of an imperious Luft, a violent Paffion, or interfering Interest, is a Brute to those that stand in his way, obstruct his Views, embaraís his Schemes, or any way. oppose the darling Passion and Defire of his Soul. Look into the feveral Ranks, Orders, Societies, and Affemblies of Mankind; (the Courts of Princes and Affemblies of Ladies only excepted; where nothing but Truth and Virtue, Politeness and Honour can find Admittance:) and you will find more Treachery. and Iniquity, more Fraud and Cunning, than among the Beafts of the Field, or the most favage Inhabitants of the Defart. ---- I was once rallying a very pretty Lady, who was (mothering a favourite Lap-Dog with a Torrent of Kiffes and tender Speeches; Fie, faid I, Madam, How can you beftow fo many Careffes upon that little Beaft, which many an honeft Man would be glad to purchase at any rate? Sir, faid she, I love my little Dog, because he loves me; and when I can meet with any one of your Sex, that has half fo much Gratitude and Sincerity as my poor Totty, he shall never find me infenfible or ungrateful. To fay the truth, Ingratitude and Infincerity feem to be Vices of mere human Growth, feldom or never to be found among the Brute-Creation; on.

the

the other hand, many illustrious and furprizing Instances of Gratitude from Brutes to Men who have been their Defenders, Phyficians, or Benefactors, not only stand recorded in ancient Hiftory, but are matters of daily Observation. And is not a poor honest Cur that loves and watches, and barks for the Security of his Master, a Reproach to an unfaithful Servant, a treacherous Friend, or a deceitful Companion ?-----Were any confiderate Man to take a cool and impartial Survey of human Nature, could he trace the fubtle Wandrings even of his own Heart, thro' the many intricate Mazes, the numberless Bypaths of Fraud and Cunning, Diffimulation and Hypocrify, by which the Interests and Counfels of this World are usually directed and fupported, he would blufh to find that all those unamiable, or, to speak more properly, detestable Qualities, which are to be found in the most malignant Parts of the Brute-Creation, are to be found in a more eminent degree of Malignity in his own corrupt. Heart.--But whither am I wandering? Let us return to our Subject.

You, Madam, who judge by Principles of common Senfe, without the Prejudices of Philofophy, I make no doubt are throughly fatified that Brutes have Souls endued with fuch Powers of *Thinking*, *Reafoning*, and *Willing* as is neceflary for their State and Condition in the Scale of Beings. But how will you be able to convince your learned Neighbour, with whom you have maintained many a warm Debate, and must expect many more it

if you give into my Sentiment, and declare your felf on my fide of the question ? You must expect neither Mercy nor Manners if you dare to contradict or differ in the least from this great Oracle Mr. Locke. To fay the truth, the honeft Man without Tafte or Ge-. nius fets up for a Philosopher upon the fole Credit of having read his Book, and fubmitting more implicitly to his Authority than to his Bible, tho' he understands them both alike. He will certainly tell you as he often has me, that neither he nor Mr. Locke denies their having Souls, but improperly fo called; not fpiritual immaterial Substances, but Matter fo fublimated and refined, of fuch an exquisite Frame and Texture, as to be capable of Thought and fpontaneous Motion, and all the other Qualities and Properties which in a more exalted and proper Senfe are truly attributed to incorporeal and fpiritual Beings.

The Poffibility of a material Animal, of felf-moving thinking Matter, has at first fight fuch a glaring Appearance of Contradiction, that it is amazing how any Man of Senfe, but especially of superiour Parts and distinguished. Abilities, could ever ferioufly maintain it; and it will puzzle the wifeft Man to shew what real Purposes of Philosophy or Religion can. be promoted by it. The most material (pardon me, Madam, I did not intend it for a, Pun) I fay, the most material Argument that has been brought to fupport it, is the fup-, poling and calling the accidental Affections of E

Matter.

Matter, fuch as Gravitation, Attraction, Electricity, Fermentation, and Rarefaction, the effential Properties of Matter, with which it has really no natural Connection, or neceffary relation to it. The Cobefion of the feveral parts of Matter, *i. e.* the Power by which they are united and cemented together; The Gravitation, Attraction, or Power by which the feveral parts of the System gravitate or are attracted to each other, is intirely and effentially diffinct from the Matter it felf.

The great Sir Ifaac Newton, as quoted by Mr. Locke, p. 149. who adopts his Sentiment in confirmation of his own, feems in his younger Days to have been in the fame way of thinking. I shall give it you in Mr. Locke's own Words, in his Answer to the Bishop of Worcester. You ask (says he) how can my Idea of Liberty agree with the Idea that Bodies can operate only by Motion and Impulse? Anfw. By the Omnipotency of God, who can make all things agree that involve not a Contradiction. He goes on, 'Tis true, I fay, that Bodies operate by Impulse, and nothing else, and so I thought when I writ it, and yet can conceive no other way of their Operation; but I am fince convinced by the judicious Mr. Newton's incomparable Book, that 'tis too bold a Prefumption to limit God's Power in this point by my narrow Conceptions. The Gravitation of Matter towards Matter by ways inconceivable to me, is not only a Demonstration that God can, if he pleases, put into Bodies Prewers and Ways of Operation, above

above what can be derived from our Idea of Body, or can be explained by what we know of Matter, but also an unquestionable and everywhere wifible Instance that he has done fo. Now with all due Submiffion to the Judgment of both these excellent Writers. I cannot help thinking this to be a very crude and uncorrect manner of expressing a very unphilolophical Thought. That God can, if he pleases, put into Badies, Powers and Ways of Operation, above what can be derived from our Idea of Body; That God can either immediately by his own Power, or mediately by the Operation of inferiour Intelligences, communicate what kind or degree of Motion he pleafes to any part or portion of Matter; that he can exalt, refine, transmute, and model it into what Form or Shape he pleafes; that he can make even the vileft part of Matter a proper Vehicle, Habitation, or Body for the mast glorious Angel, who can deny? But what then? What will this prove ? Will this juffify our confounding two diffinct Ideas? Must we confound Matter with Motion, Body with Soul, becaufe we find them existing or united together? Does not the very Expression of putting Powers and Ways of Operation into Bodies. imply that those Powers are distinct from Bodies, fomething fuperadded to them by the ompipotent Power of God? Something not included in the Idea of Body, not effential to, it; Why then must they be confounded together? When we read, Gen. ii. 7. That the Lord ·E 2

Lord God formed Man of the Dust of the Ground, and breathed into his Nostrils the Breath of Life, and Man became a living Soul; Would it not be a strange Conclusion to infer from thence, that that very Dust of the Earth out of which his Body was formed, was that very Breath of Life which was breathed into him, by which he became a living Soul? Yet would there be quite as much Reason and Truth in the one Conclusion as in the other. In the Case of Gravitation of Matter towards Matter. is it supposed to be an effential Quality inherent in the very Brute-Matter of which the feveral Orbs are composed, or is it conceived to be a Power or Direction fuperadded to it, by an immediate Impression communicated from God? I affure you, Madam, there are Difficulties in either Supposition not eafily furmounted. Would there be any Abfurdity in fuppofing, that as the whole System is under the Protection, Direction, and Guidance of God's univerfal Providence, without which not the vileft Infect, no, nor even a Hair of our Heads, could fall to the ground; fo every particular Orb, every Branch of the System might be under the Direction of fome fupegiour Intelligence, who might be confidered as the Angel, the Spirit, or Soul of that particular Orb, whofe whole Province might be the Guidance and Direction of its Motions. This, I am fure, is more agreeable to the Philofophy of Scripture, and the Sentiments of that Oracle from whom Sir Ifaac is supposed to have

have borrowed his Principles, or at least for much Light as to enable him to improve and compleat his System.

That Matter cannot move itfelf, that Reft or Refistance are its effential Qualities; that Motion, or the Power by which any Portion of Matter is moved, is diffinct from the Matter fo moved; that every kind or degree of Motion supposes a moving Power or Principle, which must be immaterial; that the Matter moved, and the Power moving, are intirely diftinct, are Principles fo plain and obvious as not to admit of a Debate, or a Queftion. Every degree of Motion, therefore, impreffed upon Matter, necessarily supposes an immaterial Principle by whom the Impression is made. And notwithstanding all this, to imagine, that Creatures endued with the Powers of spontaneous Motion, Thinking, and Volition, as the Brutes are acknowledged to be, fhould have no fpiritual or immaterial Principle in them, fhould be nothing but meer Matter, is to me an inconceivable Point of Philofophy. Sure I am that Mr. Locke's first and cooleft Thoughts before he was whetted by Opposition, and warmed by Controversy, were very different from what he afterwards advan+ sed in the Course of his Dispute with the Bishop. He seems to express himself very clearly upon this Point, page 159. Edit. 8vo. The primary Ideas (fays he) we have peculiar to Body as contradiftinguish'd to Spirit, are the Cohefion of folid, and confequently separable Parts, and

end a Power of communicating Metion by Impulfe; thefe, I think, are the original Ideas proper and peculiar to Body ; for Figure is but the Confequence of finite Extension .- The Ideas we bave belonging and peculiar to Spirit, are Thinking and Will, or a Power of putting Body into motion by Thought, and which is confeouent to it. Liberty. For as Body cannot but communicate its Motion by Impulse to another Body, which it meets with at reft; fo the Mind can put Bodies into motion, or forbear to do fa: as it pleafes. Here, I think, the learned Author has expressed himself in very plain and intelligible Language. And yet this fame excellent Perfon in his Controverfy with the Bilhop, falls into a quite different, way of Thinking and manner of Expression : He frequently afferts, or firongly infinuates, the Possibility of Thinking Matter, and endeayours to prove it by fuch Mediums, as his cooler Thoughts would never have entertained, or rejected with Contempt. Hear how he reasons in his third Letter, pag. 396, 397. Your first Argument I take to be this, that according to me, the Knowledge we have being by our Ideas, and our Idea of Matter in general, being a folid Substance, and our Idea of Body being a folid, extended, figured Subftance ; if I admit Matter to be capable of Thinking, I confound the Idea of Matter with the Idea of Spi+ rit. To which I answer, No; no more than I confound the Idea of Matter with the Idea of a Honly when I (ay that Matter in general is a folid Ξ.

**folid** extended Subftance, and that an Horfe it a material Animal, or an extended folid Subfrance with Senfe and foontaneous Motion.

The Idea of Matter is an extended folid Sub-Rance; wherever there is fuch a Substance, there is Matter and the Esfence of Matter, whatever other Qualities not contained in that Effence It foall pleafe God to superadd to it. For example, God creates an extended folid Substance. without fuperadding any thing elfe to it, and fo we may confider it at reft : to some Parts be superadds Motion, but it has still the Effence of Matter : other Parts of it he frames into Plants, with all the Excellencies of Vegetation, Life, and Beauty, which is to be found in a Role, or a Peachs tree, Sc. but it is fill but Matter : to ather Parts be adds Senje and spontaneous Motion, and those other Properties that are to be found in an Elephant. Hitberto'tis put doubted but the Power of God may go, and that the Properties. of a Rose, a Peach, or an Elephant, superadded to Matter, change not the Properties of Matter, but Matter is in these things Matter fill. But if one go one flep further, and wenture to fay, God may give to Matter Thought, Rea-Jon, and Volition, as well as Senje and Spontaneous Motion, there are Man ready prefently to limit the Power of the Omnipotent Creator, and tell as he cannot do it; because it destroys the Effence, and changes the effential Properties of Matter. To make good which Affertion, they have no more to fay, but shat Thought and Rea fon are not included in the Effence of Matter.

I grant it, but whatever Excellency not contained in its Essence be superadded to Matter, it does not destroy the Essence of Matter, if it leaves it an extended solid Substance: wherever that is, there is the Essence of Matter; and if every thing of greater Perfection, superadded to such a Substance, destroys the Essence of Matter, what will become of the Essence of Matter in a Plant or an Animal, whose Properties far exceed these of a meer extended solid Substance?

But it is further urged, that we cannot conceive how Matter can think, I grant it : but to argue from thence, that God therefore cannot give to Matter a Faculty of thinking, is to fay God's Omnipotency is limited to a narrow Compass, because Man's Understanding is so; and bring down God's infinite Power to the Size of our Capacities. If God can give no power to any part of Matter, but what Men can account for from the Effence of Matter in general: if all fuch Qualities and Properties must destroy the Elfence, or change the elfential Properties of Matter, which are to our Conceptions above it, and we cannot conceive to be the natural Confequences of that Essence; it is plain that the Es-Jence of Matter is destroyed, and its effential Properties changed in most of the sensible Parts of this our System: for it is visible, that all the Planets have Revolutions about certain remote Centres, which I would have any one explain, or make conceivable by the bare Effence or natural Powers depending on the Effence of Matter in general, without something superadded to that Esfence.

5

Effence, which he cannot conceive; for the moving ing of Matter in a crooked Line, or the Attraction of Matter by Matter; is all that can be faid in the cafe; either of which, is above our reach to derive from the Effence of Matter or Body in general; though one of thefe two must unavoidably be allowed to be superadded in this Instance, to the Effence of Matter in general. The Omnipotent Creator advised not with us, in the making of the World, and his Ways are not the less excellent, because they are past finding out.

In the next place, the vegetable part of the Creation is not doubted to be wholly material; yet be that will look into it, will observe Excellencies and Operations in this part of Matter, which be will not find contained in the Essence of Matter in general; nor be able to conceive how they are produced by it, and will be therefore say, that the Essence of Matter is destroyed in them, because they have Properties and Operations not contained in the essential Properties of Matter as Matter, not explicable by the Essence of Matter in general?

Let us advance one step further, and we shall in the Animal World meet with yet greater Perfections and Properties no way explicable by the Essence of Matter in general. If the Omnipotent Creator had not superadded to the Earth, which produced the irrational Animals, Qualities far surpassing those of the dull dead Earth, out of which they were made; Life, Sense, and spontaneous Motion, nobler Qualities than were before before in it, it bad fill remained rude fenficiefs Matter; and if to the Individuals of each Species, he had not juperadded a Power of Propagation, the Species had perifhed with those Individuals: but by these Essences or Properties of each Species, juperadded to the Matter which they were made of, the Essences or Properties of Matter in general were not destroyed or changed, any more than any thing that was in the Individuals before was destroyed or changed by the Power of Generation superadded for the Matter in the first Benediction of the Almighty.

In all fuch Cafes the Super-inducement of greater Perfections and nobler Qualities, defires nothing of the Effence or Perfections that were there before ; unless there can be shewed a manifeft Repugnancy between them : but all the Proof offered for that, is only that we cannot conceive bow Matter, without fuch fuperadded Perfections, can produce such Effects; which is, in truth, no more than to fay, Matter in general, or every part of Matter, as Matter, bas them not; but is no Reason to prove, that God, if be pleases, cannot superadd them to fome parts of Matter, unless it can be proved to be a Contradiction that God should give to fome Parts of Matter Qualities and Perfections which Matter in general bas not; the' we cannot conceive how Matter is invested with them, or bow it operates by virtue of these new Endowments : Nor is it to be wondered, that we cannot, whilf we limit all its Operations to those Qualities it had before, and would explain them by the known Qualities

Qualities of Matter in general, without any fuch fuperinduced Perfections. The loofe Reafoning, the lumble of Ideas, the Confusion of Sentiment, the evalive Diftinctions that appear in every Sentence of this tedious Quotation. are a melancholy Proof of the Weakness of human Understanding, and the mighty Power of Prejudice, Paffion and Self-love to miflead and pervert it. Nothing furely but a Love of Fame, an Impatience of Contradiction, and a Defumi Victory, could feduce fo great and excellence a Perfon to depart from the plain and obvious Principles of Reason and Philosophy, which himself had in the cleareft and ftrongest manner afferted and maintained. If Inactivity or Refistance to any change of the State it is in, either of Rest or Motion, be -one of the primary and most obvious Qualisties of Matter, which I prefume will not be disputed : it will unavoidably follow, that every poffible kind or degree of Motion, all the feveral Ohanges and Modifications that can possibly be made in any part or portion of Matter, must be derived from some immaterial and spiritual Principle, who is the Source of that moving Power by which all the pof-· fible Changes of State, or Place, can be effec-, ted. Either there is Inactivity or Refistance in Matter, or there is not. If there is, it cannot poffibly move itfelf, fince two Tendencies or Properties opposite and destructive to each other, can never subsist in the same Subject. If there be no Refistance, the Action of Mat-F 2 ter

ter upon Matter would be wholly inconceivable, or rather impoffible, unless that other Matter could be moved by nothing at all; to that in either cafe, Matter can never become a felf-moving Substance, no not by any Power, because it implies a Contradiction. You fee then how unreasonably Mr. Locke refolves the Poffibility of spontaneous Motion superadded to Matter, in order to form or explain the Poffibility of a material Soul or Thinking Matter, into the Omnipotency of God, who can make all Things agree, that imply not a Contradiction; but this implies a glaring Contradiction, and therefore must be given up for an Impoffibility. What then muft we fay? What must be the Confequence? Why it is, it must be plainly this, that fince Matter is abfolutely incapable of those Qualities and Operations which appear through the whole Brute-Creation, if it cannot produce Thought, Volition, and spontaneous Motion, we must affign some other Cause to which these Effects may properly be afcribed, which must be an immaterial and fpiritual Principle, truly and properly called a living Soul, I know you will be well pleafed to find what I have here advanced confirmed by no lefs an Authority than that of the late learned Dr. Clarke, in his Demonstration, &c. Part II. Page 300. Edit. 4. and Page 221. Edit. 6. All things that are done in the World (fays he) are done either immediately by God himself, or by created intelligent Beings: Matter being evidently not at al!

all capable of any Laws or Powers what foever. any more than it is capable of Intelligence ; excepting only this one negative Power, that every part of it will always and necessarily continue in that State, whether of Rest or Motion, wherein it at prefent is; so that all those things which we commonly fay are the Effects of the natural Powers of Matter; and Laws of Motion, as Gravitation, Attraction, or the like, are, indeed, (if we will speak strictly and properly) the Effect of God's acting upon Matter continually and every Moment, either immediately by himfelf, or mediately by fome created intelligent Being : which Observation, by-the-bye, furnishes µs, as has been before noted, with an excellent natural Demonstration of Providence : confequently there is no fuch thing as what Men call the Course of Nature, or the Power of Nature. The Courfe of Nature, truly and properly speaking, is nothing elfe but the Will of God producing certain Effects in a continued, regular, constant, and uniform Manner : which Cour fe or Manner of acting, being in every Moment perfectly arbitrary, is as eafy to be altered at any time as to be preferved. In fhort, the thing speaks itself, I dare fay you require no other Evidence than your own Reason suggests to you; but your Reverence for Dr. Clarke as a Philosopher, gives you the additional Pleafure of finding him clearly on the fame fide of the Question.

To many a fine Lady, yea and many a fine Gentleman, I should think myself bound to make an Apology for attempting to lead them thro

thro' fo many hard Words, into fuch abstract. ed Speculations; but to offer at any to you would be an Affront to your Understanding. You, Madam, who have improved a fine Taffe by an early Acquaintance with the best Writers of our Age and Nation, who can enter into their Reasonings, and point out with a critical Delicacy, their diftinguishing Beauties, which you even improve by repeating them; you who can find a more agreeable Entertainment in the polite and rational Pleasures of the Mind, than in the fashionable Follies of Life; who can find more Delight in the Charms of Poetry, and the fevere Speculations of Philofophy; than in the infipid Chit-chat of a modern polite Conversation, will, I hope, think it no bad Compliment to your Understanding, that I submit my most laboured Thoughts to your Cenfure and Correction, and even glory in your Approbation.

Well, Madam, thus far I think we have pretty well cleared our way through the Intricacies of Philosophy to one certain Conclution, that Brates have Souls, fpiritual and immaterial Beings. Here then let us make a stand, and take breath, let us look forward and backward, let us survey the Ground we have past, whether we have made no false Steps, mistaken our Direction, or deviated in the least from the direct Path of found Reason and true Philosophy.; if not, what must be done next, inust we sit down contented with our present Discoveries, or must we venture to proceed a ftep

step further? Methinks I fee your thoughtful penetrating Genius at a great difficulty; retreat you cannot, as a Philosopher : +-- Advance you dare not, as a good Chriftian Methinks I hear you fay, or I am fure you think with a kind of religious Horrour-What then must be the Confequence !---- If they are immaterial and spiritual, they must by unavoidable Confequence be immortal, which has been generally the Medium to prove the Immortality of human Souls, which has the terrible Appearance of philosophical Herefy -- Conrage, Madam, never fear, we will purfue this Thought no further than we have the Light of Reason and Revelation to guide us; whereever that fails to direct us, we will be contract to fit down in Ignorance and Darkneis, and it souft be our own fault, if we go wrong under fuch Direction.---- It has been an invariable Rule with me, in all Cafes, (Love and Politicks, always excepted) never-to stifle a certain Truth for fear of Confequences, Juft and honeft Premifes are a kind of loving Things, swhich never fail to beget just and honest Conclufions, which being the legitimate Off-fpring of virtuous Parents, and Heirs-Apparent to the found and virtuous Conftitution of their Progenitors, cannot fail to fublish upon the Integrity of the Family; therefore, e'en let them turn out, and thift for themselves.

Why, fay you, will you dare to pronounce that the Sonls of Brutes are immortal No, truly, Madam, not I, but you thall proneunce for

shall be given. Pray, what think you was their Original State and Condition in their first happy Settlement in Paradife, when all the Works of God were pronounced to be very good? - Will you fay they were mortal? Could any Creature be mortal before Death entered into the World? And was not Death the immediate, the necessary Confequence of Sin? So the Apostle tells us, Rom. v. 12. By one Man. Sin entred into the World, and Death by Sin. And-was not Sin an accidental Transgreffied of the Law of God, a Violation of the Laws of Truth and Order; a Breach of the Harmony of Nature? And by Confequence a Contradiction to the Will of the Creator ? Now, if Death were the Confequence of Sin, the Effect of the Trangression, which we are affured of both by Reafon and Revelation, is it confiftent either with Philosophy or Religion, to suppose that the Effect should precede the Caufe, that the Execution should anticipate the Sentence of Condemnation, and the Sentence the Transgreffion ? In this view of the cafe, therefore, there feems to be a ftrong Pre-. fumption, that in the Intention of their Creator in their original Frame, and their Relation to the universal System, they were to be Partakers of that Bleffing and Immortality which was the Privilege of the whole Creation, till Man by his Difobedience forfeited it for himfelf, and by confequence for them. Can any Man prefume to fay, that infinite Wildom 1.1 created

created any thing in vain? That in the infinite Variety of Creatures, there was fo much as one that was superfluous or useles? That he who proportioned and formed the whole Syftem in Number, Weight, and Measure, Wild. xi. 20. did not intend even the minutest Portion of it to be a Monument of his infinite Wifdom and Goodnefs, by contributing to the Beauty, the Order, and Harmony of the whole ? And if the Prefervation of the Spe-. cies, was necessary to perpetuate the Harmony of the whole, what probable or poffible Reafon can be affigned for the Destruction of the Individuals? I am apt to believe it will be difficult to affign any that will not as ftrongly conclude against the Individuals of our own Species, as of any other, and what Occasion can there be for indulging bold Conjectures, and striking out new Hypotheses, to depreciate the Wildom, debase the Goodness, and limit the Power of the Almighty, and all this to folve Difficulties and answer Objections proceeding purely from Prejudice, and Ignorance of the divine Wildom and Power. The Mercies of God are over all bis Works. He made them all to be happy, as exquisitely happy as infinite Goodness, Wisdom, and Power could make them, and their Rank and State in Nature was capable of receiving; and it is not owing to any Mutability in the Counfels of God, to any Fault of their own that they have loft any degree of that Happine's they were created to enjoy, but it is the fatal and necessary Confequence

Digitized by Google

(41)

Confequence of the relation they flood in to their unhappy rebellious Lord, and the dreadful Confusion which his Disobedience has brought upon the whole visible Creation, who were thereby made fubject to Vanity, i. e. Pain and Misery, Corruption and Death. Rom. viii. 20.

Do but examine your own compassionate Heart, and tell me, do you not think it a Breach of natural Juffice, wantonly and without Neceffity to torment, much more to take away the Life of any Creature, except for the Prefervation and Happiness of our own Being; which in our prefent State of Enmity and Difcord is fometimes unavoidable? I know you do: And can you think that infinite Mercy, who made them to be happy, could, in the primary Intention of their Nature. refolve to deprive them of that Happines (or at least a Possibility of recovering it again) by an utter Extinction of their Being ? If you or I could be fo happy as to be able to build a House, to lay out a Garden, to contrive a Machine, to draw a Picture, to compose a Poem or a Piece of Mufic fo exquisitely perfect that all the Connoisseurs in the feveral Arts could not be able to correct, or Envy itfelf to cenfure, I dare answer for you, as well as for my felf, that we should be as ambitious to preferve; as we were to produce them, and think it the highest Felicity to be able to perpetuate the Works of our Hands, or the Labour of our Brains, by making them immortal.

tal. To build up only in order to pull down, to produce or create in order to deftroy, in short, to do and to undo, without an apparent Necessity, is a Reflection upon common Senfe; and shall we, dare we, impute to infinite Wifdom, Goodnefs, and Power, an Infirmity, which a Man of common Senfe would blush to be guilty of? Were we the Owners of Animals, in their feveral kinds perfectly useful, beautiful, and good, should we not be follicitous for their Prefervation, much lefs fhould we wantonly deftroy them ? But further yet, Were we the Creators of those Animals, had we brought them into Being by the mightiest Efforts of human Benevolence, Wildom, and Power, should we not watch over them with the most endearing Marks of Tenderness and Affection? And can we (a Race of evil, weak, and partial Creatures,) have more Regard for our own Works, than the Almighty has for his? much lefs can we prefume to fay, that we have more Compassion for any of his Creatures than he that made them, 2 Eld. v. 33. And if our own Hearts affure us, that we would not wantonly torment or deftroy any of God's Creatures, it will, I think, amount almost to a Demonstration, that the Father of Mercies will not cauflefsly deftroy the Work of his own Hands, or put an endto the Being of any Creature, whom he created capable of eternal Happines.

But I expect you will tell me, as many grave Authors of great Learning, and little Under-

**G** 2

ftanding

fanding have done before you, that there is not even the Appearance of Injustice or Cruelty in this Procedure ; that if the Brutes themfelves had Power to speak, to complain, to appeal to a Court of Justice, and plead their own Caufe, they could have no just Reafon for Complaint: This you may fay, but I know you too well to believe you think fo; but it is an Objection thrown in your way by fome ferious Writers upon this Subject; they tell you, that their Existence was given them upon this very Condition, that it should be temporary and fhort, that after they had flutter'd, or crept, or fwam, or walk'd about their respective Elements for a little Seafon, they should be fwept away by the hand of Violence, or the Courfe of Nature, into an entire Extinction of Being, to make room for their Succeffors in the fame Circle of Vanity and Corruption. But, pray, who told them fo ? Where did they learn this Philosophy? Does either Reason or Revelation give the least Countenance to such a bold Affertion ? So far from it, that it feems a direct Contradiction to both. The wife Preacher has given us a deeper and fafer Foundation for our Philosophy, Ecclef. iii. 14. Iknow that what soever God doeth, it shall be for ever, nothing can be put to it, nor any thing taken from it, and God doeth it that Men should fear before And the Royal Pfalmist, Pfal. civ. him. where he is describing the Beauty, the Magnificence, the Wifdom of the Creation, breaks out into Raptures of Gratitude and Joy: O Lord Lord (fays he, ver. 24.) how manifold are the Works, in Wildom haft thou made them all, the Earth is full of thy Riches. If then all the Works of God are the Effect of infinite Wifdom, if every, even the meaneft, the fmalleft, and most contemptible Creature, were formed. directed, and establish'd in their proper Rank and Order, by the unerring Counfel and Wifdom of the Almighty; is it not a bold Prefumption to impute to that Wildom, unworthy and contradictory Counfels? Does it not feem to imply Inconftancy and Mutability in God, that the fame infinite Wildom that made every Creature beautiful, useful, and good for certain Ends and Purposes, should destroy, or annihilate any thing that he has made, and thereby defeat the Wifdom of his own Counfels, and the Ends of his Providence? This furely must appear as shocking to Reason, as it is contradictory to Revelation. And therefore the Pfalmist, Pfal. civ. after he has described in most pompous and poetical Language, the Beauties and Glories of the Creation, particularly the Vegetable and Animal Kingdoms, feems to lament their Mortality as a Violence and Breach upon the Harmony of Nature, ver. 29. Thou hideft thy Face, they are troubled; thou takeft away their Breath, they die and return to their Duft. But he comforts himself in the next Verse, that they are not loft, their Death is but a Change of their State and Manner of Exiftence: the original Purpofes of God in their Creation shall stand for ever and ever; and whatever

whatever Changes and Revolutions they may undergo, they shall in due time appear again in their proper Place and Order, to fill the Station, and answer the several Ends intended by infinite Wisdom in their first Creation, ver. 30, Thou shalt send forth (for fo it should be rendered) thy Spirit, and they shall be created, (i.e. appear again in a new Form or Manner of Exiftence) and thou shalt renew the face of the Earth. the Glory of the Lord (manifested in the Renovation of the vifible World and all its Inhabitants) Shall endure for ever, and the Lord *Shall rejoice in his Works.* As he did in their first Creation, when he pronounced them all to be very good, when all the Powers of Heaven and Earth proclaimed aloud the Wifdom, the Goodness, and Power of their Maker, when the Morning Stars (ang together, and all the Sons of God shouted for joy, Job xxxviii. 7. The Evidence that appears thus ftrong from the Confideration of the Nature of God, the infinite Perfection of his Wildom, and the Immutability of his Counfels, will appear yet stronger from confidering the Nature and Condition, the Capacities and Powers of the Creatures themfelves: As they are all endu'd with Life and Motion, Senfe and Perception, and many of them, perhaps, with equal, if not quicker and more delicate Senfations in their Sphere of Ac-

(46)

tion, than many of us in ours, and these freely bestowed upon them by the overflowing Goodness of their Maker; if they were intended not only to fill the feveral Ranks and Orders they

they stand in, in the universal Scale of Beings, and compleat the Harmony of the Univerfe, but also to have their Share in the general Bleffing, and fuch a degree and portion of Happinels as they were capable of enjoying : Will any one fay, it would be no Punishment to them to be totally deprived of that Happines, and even of a Poffibility of recovering it, by an arbitrary and entire Extinction of their Being? You and I should certainly think fo, if we were to do or fuffer the fame; and we may, by more than a Parity of Reafon, be afraid to afcribe to Almighty Goodness and Wildom, what appears a Weaknels and Cruelty in our felves. Tell me not that God may do this by an arbitrary Act of his Will, and be no more partial or unjust in striking them out of the Lift of Beings, than in bringing them into it, that he may refume a Grant that he had freely given them; and who shall prefume to ftop his Hand, or limit his Power, and fay, What doeft thou? This is arguing from the Principles of human Weakness and Ignorance, the Counfels of God are not arbitrary in the human Senfe of that Word, but founded on the immutable Principles of infinite Wildom, Goodnels, and Truth, and therefore without Variableness or Shadow of changing, Jam. i. 17. His Counfels, like his Nature, are the fame to-day, yesterday, and forever. Heb. xiii. 8.

It would be the highest Presumption to pretend to limit the Power of the Almighty,

yet

yet all agree in this, that Omnipotence itfelf can do nothing that implies a Contradiction ; but is it not a manifest Contradiction to infinite Wildom, to make and unmake, to create and to deftroy? The fame infinite Wifdom and Power that brought them into Being, muft of neceffity (pardon the Expression) preferve them in it, unless we could suppose that he. who from Eternity faw through all the Poffibilities of Being, in whom every part of the Creation lives, and moves, and has its Being. should fee a Reafon for creating at one time, and deftroying at another, the Works of his own Hands.----I might push this Argument yet further, and perhaps be able to produce fomething more than Conjecture and Probability, that the very Notion of Annihilation is abfurd and unphilosophical, contradictory and impoffible; but as this would be leading you into a too tedious and abstruse Speculation. L shall content myself, and hope I have, in some measure, satisfied you, with what has been already faid upon this Subject. C G

The great Mr. Locke, in his Controversy with the Bishop of Worcester, Page 148. makes a kind of Objection to what has been here advanced, that has more the Air of a Sneer than an Argument. But here I take liberty to observe, that if your Lordship allows Brutes to have Sensation, it will follow either that God can and does give to some portions of Matter a Power of Perception and Thinking; and that all Animals have immaterial, and consequently, according to

to your Lordship, immortal Souls, as well as Men. And to fay that Fleas and Mites, &c. have immortal Souls as well as Men, will poffibly be look'd on as going a great way to ferve an Hypothesis. Many Writers fince his time have improved this Thought, in order to expose and ridicule the Immateriality of the Soul, by mentioning the Eels in Vinegar, the numberlefs Nations, which to the naked Eye appear as the Blue of a Plumb, but are difcovered by the Microfcope, to be the proper Inhabitants of that particular Orb or Sphere; but let them try the utmost Strength of these Objections, and fee what it will prove, but the Ignorance and Prefumption of those that make it. Is it not a more furprizing Inftance of the Almighty Power of God, to form fo wonderful, fo beautiful a Piece of Mechanifm in one of these minute Animals, than in that of an Ox or a Horfe, a Whale or an Elephant? What less than infinite Wifdom and Power, could form a little Portion of Matter, too finall to be viewed by the naked Eye, into that almost infinite Variety of Parts, that are necessary to form an organical Body ? Do but confider, how inexpreffibly fine, flender, and delicate, must the feveral Parts be, that are neceffary to form the Organs, to proportion the Structure, to direct the Machinery, and preferve and fupply the vital and animal Action in one of these imperceptible Animals; yet every part that is necessary to Animal Life, is as truly found in one of them, as in H Behemoth

Bebemoth and Leviathan. I very much doubt whether any Wifdom but that which framed them, can fully comprehend the Structure, the Symmetry, the Beauties of this almost imperceptible Generation, and think it must needs exceed any finite Understanding to conceive. much lefs to explain, how fuch an infinite Va-'riety of Parts, and Exercife of Powers, could be contained or exerted within fo narrow a Space : First, the Heart, the Fountain of Life ; then the Muscles necessary to produce Motion ; the Glands for the Secretion of Juices ; the Ventricle and Intestines for digesting their Nourishment, and numberless other Parts which are neceffary to form an organical Body. This Knowledge is too wonderful and excellent for any human Understanding, and it may reafonably be doubted, whether the Angels themfelves are able to explain and comprehend it. But when we further confider, that each of those Members are themselves also organical Bodies, that they confift of Fibres, Membranes, Coats, Veins, Arteries, Nerves, and number-'less Springs, Tubes, and Pullies, too fine for Imagination itself to conceive, try in the next place whether you can form the least Appearance, even of a Guess, how infinitely subtle and fine must the parts of those Fluids be, that circulate thro' these Tubes, as the Blood, the Lympha, and animal Spirits, which in the largest Animals are so exquisitely fine, that no Imagination can explain or conceive. Can any Wildom, any Power, less than infinite, produce, 20

( 50 )

or explain fuch wonderful Effects and Appearances as these ? Infinite Wildom is as truly and wonderfully difplayed in the fmalleft, as in the greateft Works of the Creation, and nothing lefs than the fame Wifdom that formed the universal System, could possibly produce the fmallest and most contemptible Being in nature. I fay then, that all these Effects of infinite Wisdom were intended to answer some end, to ferve some purpose, or they were not : they contributed something to the Beauty and Harmony of the whole, or they did not: they were either useful and necessary in their several Ranks and Orders, or superfluous and useles: Take which fide of the Dilemma you pleafe, and fee what Confequences will unavoidably follow. If you fay they were made for fome end, to answer some purpose, that they cortributed to the Beauty and Harmony of the whole, it will neceffarily follow, that they do fo still, unless you will venture to fay, that the System is alter'd, that what was once neceffary is not fo now; which would be an abfurd and blasphemous Imputation upon infinite Wisdom. It will therefore follow, that whatever Uses or Purposes were intended in their Creation, can only be fupplied and anfwered by still preferving them in being. If they were created by infinite Wildom, the fame infinite Wildom will also preferve them : if you doubt or deny this, you must unavoidably fall into the other fide of the Dilemma, and fay that they were not the Effects of infinite Wif-H 2 dom.

dom, that they were not made to ferve any end, or answer any purpose, that they contributed nothing to the Beauty and Harmony of the System, that many of them are not only ufeless and unnecessary, but noxious and mischievous, and had better either not have been created at all, or immediately ftruck out of the Lift of Beings, to prevent their doing more Mischief; in short, that they were a fort of By-blows, Excrescencies, or fortuitous Productions, with which infinite Wildom had no manner of Concern, either in their Formation or Prefervation. Does not fuch a Thought as this strike you with a kind of religious Horrour? Is not the Blafphemy as flocking to your Piety, as the Nonfense to your Underftanding? Yet one of these must be maintained to support the other fide of the Queftion. I will therefore venture to conclude, that whatfoever Creatures infinite Wildom faw fit to produce in the first Creation, will be preferved by the fame infinite Wildom fo long as the System itself shall continue, which is as certain a Conclusion, as that the Parts shall continue as long as the Whole, the Materials shall subsist as long as the Fabrick; and this not only with regard to the Species, but to all the Individuals of the feveral Species, which, as Religion and Philosophy affure us, were actually exifting in their first Cause or Parent. when the divine Benediction, to increase and multiply, was pronounced upon them, and they were declared by God himfelf to be very very good. Whatever Arguments have or may be produced in Vindication of the Wifdom and Goodness of God in the Works of the Creation, will (I humbly conceive) more ftrongly conclude for their Immortality : and if fo much as the Shadow of a Reafon can be alledged for their Annihilation or utter Extinction of their Being after Death, it will as ftrongly conclude against the Wisdom of their first Creation. And whether such a Concession might not have a fatal Influence upon weak and irreligious Minds, deferves well to be confider'd, whether they might.not from hence be induced to believe or to hope, at least, that they might receive the fame Indulgence as the reft of their Fellow-Brutes, and be no more accountable for the Sins of a long Life, the Abuse of nobler Faculties, the Defiance of the highest Authority, the Contempt of the plainest Duties, and a Violation of the most reasonable Commands, than the poor Brutes, who have no Sin to answer for, and would never have known either Pain or Sorrow, Suffering or Death, had our first Parents but continued as innocent as they: What then should hinder their Continuance in being after the Diffolution of their Bodies ? Why may not the immaterial Form be disposed of in its proper State, waiting for the Time of the Restitution of all things, Acts iii. 21. When the whole [uffering Creation shall be delivered from the Bondage of Corruption into the glorious Liberty of the Sons of God. Rom. viii, 21. The wife Preacher

Preacher feems to have express'd his Thoughts very plainly upon this Question, Eccl. iii. 21. where he mentions the Spirit of a Man, and the Spirit of a Beast, however different in their specifick Dignity and Qualities, yet both equally immaterial and immortal, both returning, after the Diffolution of their Bodies, to rheir proper State or Centre : The Spirit of the Man going upwards, and the Spirit of the Beast going downward; that is, the former afcending, the other defcending to their proper Rank or Sphere in the invisible World.-And after all, where is the Difficulty of comprehending, or the Danger of afferting this proper Affortment of the feveral Species of Beings, according to their original State in the Order of Creation? What need is there of fo much phi-Iofophical Refinement and Caution in explaining fo obvious a Question ? What possible Danger can there be in afferting a Truth too plain to be denied, or what Purposes of Religion can be ferved in concealing or difguifing a certain Truth, in order to establish an uncertain, I had almost faid an impossible Conjecture? Tell me ingenuoufly, Madam, can you hefitate a Moment how to determine upon this Question? Some learned Men have ftarted a Difficulty, how these separate Essences, or Brute-Souls, are to be disposed of after Death. Thus, particularly, the pious, learned, and Right Reverend Author of The Procedure, Extent, and Limits of Human Underfanding, expresses his Doubts and Fears, Page 173,

173; 174. They who hold fensitive Perception in Brutes to be an Argument of the Immateriality of their Souls, find them jelves under a Necessity of allowing those Souls to be naturally immortal likewife, and they are fo embaraffed how to dispose of those irrational immortal Souls after the Diffolution of their Bodies, and what fort of Immortality to conceive for them, that they imagine them all to return to the great Soul or Spirit of the World, or by a Metempfuchofis to pass into the Bodies of succeeding Animals, and then when they have done their Work at the end of the World, they are to be discharged out of Being, and again reduced to their primitive nothing.-Again-If those Souls are once granted to be immaterial, it is utterly inconceivable that they should not naturally have the fame Immortality with those that are human; fince we cannot with any Senfe or Confiftency distinguish two different kinds of Immortality for created Spirits, if the Souls of Brutes be immortal, that cannot when separate be thought to remain altogether in a State of Inactivity or Infensibility. which communicated Senfe and Activity to Matter, while in conjunction with it; and if so, they must be senfible of Happiness or Misery, and in fome degree liable to Rewards and Punishments as eternal as their Souls. He concludes, What beightens the Absurdity of this way of Thinking, is, that in imagining the Souls of Brutes to be immaterial, Men must necessarily distinguis a great Variety of them, both in Nature and Degree, one fort for Birds, another for Beafts, and

and another for Fishes; and these must be all fubdivided again into very different Species of immaterial Souls, according to the different forts there are under each of theje general Heads. Nay, every Fly and Infect must on this Supposition have some fort of immaterial Soul, even down to the Cheefe-mites ; and what is yet more absurd, is, that there must be an infinite Variety of Immaterialities imagined, to Juit the Rank and Condition of every individual, living, sensible Creature. What a Rhapfody is here! Can there be a more lively Picture of a puzzled Imagination, terrified with Spectres, and combating with Difficulties of its own creating? If the Premises be just, the Conclusion must be to too, they must stand or fall together : If the Evidence be ftrong for the Immateriality of Brute-Souls, as I believe you think it is, their Immortality must, in my Opinion, be the natural Confequence : And how are we concerned to enquire what shall become of them in their separate State? What is it to us to know how they shall be disposed of after the Diffolution of their Bodies? Cannot infinite Power, which formed them without our Advice and Affiftance, difpofe of them in the fame manner ? This, I think, is certain, that if they are immaterial, and confequently immortal, if their Souls animated certain Bodies in this Life, and were the proper Principles of their Action, they cannot ceafe to be active after they are in a separate State, and must have a peculiar Sphere of Life and Action without

without their Bodies, as well as they had on Can you, Madam, conceive what them. would have become of the numerous Defcendants of the feveral Species of Beings. (whose peculiar Bleffing from God was to increase and multiply) if Adam had not finned. nor by confequence Sin and Death entered into the World? Can we suppose that he who made them to increase and multiply, had not made a proper Provision for their Reception? And will not (think you) the fame Wifdom and Power continue the fame Provision for them still? Can any Man pretend to tell me what is the State of feparate Souls? Where, or what, or how many are the different Manfions and Receptacles of the Dead? Thefe are idle Enquiries, unanfwerable Queftions, yet does any reafonable Man doubt whether there are fuch Manfions, fuch proper Habitations for feparate Spirits, and if for one Rank of Beings, why not for all? And is it not a monftrous Prefumption in us, who are ignorant of the plainest things, and can hardly judge aright of the commonest things that are upon earth, and find not without great labour the things that are before us, Wild. ix. 16. to be prescribing Bounds to omnipotent Wifdom, directing the Exercise of infinite Power, by our narrow Apprehensions of the Nature of things, and the Power of God ? His Objection against the fame Immortality allotted to different Species of Beings, is very crudely and obscurely expreffed. Immortality, or a Perpetuity of Exiftence

istence in its abstracted Nature, to whatever different Ranks or Species of Beings it is applied, must be one and the fame, however different their State and Condition may be. As for the Brute-Souls being fenfible of Happinefs or Mifery in their feparate State, Why not? as well as in their prefent natural State? If they are capable of Happiness or Misery here, if they are the Objects of divine as well as human Compaffion in their prefent State, (which both Reafon and Revelation plainly evince) what fhould hinder their being capable of higher degrees of Happines in their feparate State in the invifible World, as well as they were in their first Scituation in Paradife, before Sin and Death entered into the World, and they funk with us under the Bondage of Corruption? But to fay (as our Author does) that it will thence follow they are liable to Rewards and Punishments, requires both Proof and They were not moral Agents, Explanation. nor is their prefent Unhappines the proper Punishment of any abuse of their Free-will, the Violation of any Duty, the Transgreffion of any Command, or Difobedience to the Will of their Maker. This the Apoftle exprefly declares, Rom. viii. 20. That they were made subject to Vanity, not willingly, not by any Fault of their own, but by reason of him, upon the Account, by the Transgreffion of Man, who has subjected them to it in hope; that is, in certain hope of being delivered from a Mifery they had not delerved, from a Bondage which

which they had not brought upon them felves, but. were neceffarily involved in it by the relation. they ftood in to our first Parent, who was their natural Lord, the Sovereign and Governour of the whole Mundane System. And why does he fay it heightens the Abfurdity of this way of Thinking, that we shall be obliged to diftinguish a great Variety of Souls, both in Nature and Degree, for the great Variety of Beings ? Why is it a greater Abfurdity to fuppofe different Species of immaterial Souls, than different Species of material Bodies? If (as the Apostle reasons, I Cor. xv. 39.) All Flesh is not the same Flesh, but there is one kind of Flesh of Men, another Flesh of Beasts, another of Fishes, and another of Birds : Where would be the Abfurdity of thinking or faying, all Souls, or Spirits, or immaterial Beings are not fpecifically the fame, but there is one kind of Soul of Men, another kind of Beafts, another of Fishes, another of Birds, and another of Infects, and perhaps another of the various Tribes and Families of each? It is at least highly probable that it is fo, and the Appearance of Abfurdity arifes from nothing elfe but our Ignorance of the Ways of God, and his mysterious Operations in the Frame and Course of Nature, and a vain Prefumption. that we are competent Judges of both. This it is that tempts us to prefcribe Limits, and direct the Exercise of infinite Power; this tempts us to form Hypotheses, and lay Schemes for the Operations of Omnipotence, and charge

I 2

every

every Deviation from it as absurd and unreasonable. And by the fame Method of Reafoning, we might, (if Experience did not convince us) as wifely infer that the almost infinite Variety of material Bodies were absurd and impossible, And after all this Appearance of Abfurdity, it is more than probable that this great Variety of immaterial Souls both in Nature and Degree for Infects, Fishes, Birds, and Beafts, ought to be regarded as a fingular Article in the Harmony and Beauty of the Creation, in the rifing Scale of immaterial Beings. When we observe such a wonderful Gradation of Beauty, Form, Perfection and Proportion, in the feveral Parts of Matter, through the Animal, Vegetable, and Mineral Kingdoms, through all the Species of Fosiils, Plants, and Animals, up to the human Body, it must appear to a rational and attentive Mind, to be a wide and unnatural Chafm in the Nature of things, if there were nothing between dead Matter and the human Soul. Let us not then embarrafs ourfelves with Doubts and Enquiries about the Purpoles and Counfels of infinite Wildom, in the Creation of fuch a wonderful and beautiful Variety of Animals, thro' all the feveral Regions of Nature; but fatisfy ourfelves, that as nothing lefs than infinite Power could produce the least and most contemptible into Being, fo nothing lefs than infinite Wildom has formed and directed them to anfwer the feveral Purpofes of their Creation, and fill their different Ranks and States in the -Scale

Scale of Being, and that the fame infinite Wifdom will not fail to difpose of them hereafter in the most proper Manner, to answer the original Purposes of their Creation. Thus much we may venture to pronounce with fafety, that it is by no means inconfistent with Reafon, that there may be feveral Degrees and Orders of immaterial Beings, with different Powers and Faculties, according to their different Ends: And that fuch of these as are capable of actuating Bodies, may be disposed of in different Bodies, according to their different Capacities: and when the immaterial Beings are separated from these Bodies, so that the Bodies are dead, no Man can prefume to fay that it is impossible or unreasonable, for omnipotent Wildom to continue them in being, and dispose of them in such a State or Condition as he shall see fit. And if partial human Benevolence, if limited human Understanding, could conceive any poffible Reafon, or contrive any poffible Means to continue their Béing, and their Happiness in a State of Separation, then it is neither an abfurd Thought, nor impious Hope, that their Almighty and most Merciful Creator, whole Compassions are over all his Works, may effect both, fince nothing lefs than both could at first move him to bring them into Being, and fuch a State as the Harmony of Nature required, and infinite Wildom faw fit for them.

And now, Madam, I appeal to you and to every fenfible impartial Reader, to tell me what

what poffible ill Confequences can be drawn from the Supposition of their Immortality; or what poffible Advantage to the Interests of true Philosophy and Religion can arise from denying it? The Infidel will be pleafed to hear you own the Poffibility of a material Soul of thinking Matter, and comfort himfelf with the hope that he with the reft of his reafon-. ing Fellow-Animals may be exactly of the fame make, have nothing in them fuperiour to Matter, no Principle of Immortality, nothing capable of eternal Rewards and Punishments; tho' he himfelf would eafily turn the Tables upon you, and prove the contrary from the plainest Principles of Nature and Philosophy. On the other hand, if we could prove to his Satisfaction, that every kind and degree of Life through the universal System must necesfarily be immortal, it would prove ftrongly upon him the neceffity of his own Immortality, and quite deftroy the feeble, the terrible Hope of Annihilation, or utter Extinction of his Being; it would fhow him in a ftrong and amazing Light, the abfolute Impoffibility of evading the proper and neceffary Punifhment of a wicked and ungodly Life, the unavoidable Confequences of brutish and vicious Habits, debafing the Soul, degrading it from its proper Rank and Dignity, corrupting all its Faculties, and rendering it uncapable of those divine Communications which are the proper Life, the only real Felicity of human Souls. But to return,

The

The wonderful Gradation in the Scale of Beings (fo far as our Senfes can difcover it) is not only the Object of daily Experience and Admiration, but is also a noble Key to open to us the more remote and invifible Scenes of Nature and Providence, and to raife upon the Foundation of a just and proper Analogy, a rational Superstructure little inferiour in Evidence and Strength to a Mathematical Demon-As we observe in all Parts of the ftration. Creation, that there is a gradual Connection of one with another, without any great or difcernible Gaps between, that in all that great Variety of Things we fee in the World, they are all fo clofely linked together, that it is not eafy to difcover the Bounds between them; we have all the reafon imaginable to believe, that by fuch gentle Steps, and imperceptible Degrees, Beings afcend in the universal Syftem from the loweft to the higheft Point of Perfection. Where is he that can fettle the Boundaries of the material and spiritual World? Who can tell where the fenfible and rational begin, and where the infenfible and irrational end? Who can precifely determine the lowest Species of Animals, and the first and higheft Degree of inanimateBeings? The whole System of natural Beings, so far as we can observe, lessen and augment in the same Proportion, as the Quantity does in a regular Cone, where though there be a manifest difference betwixt the bigness of the Diameter at remote Distances, yet the difference betwixt the

the upper and under, where they touch each other, is hardly difcernable : The Difference betwixt Man and Man is inconceivably great. Were we to compare a Newton, a Locke, or a Boyle, with that fort of human Creatures commonly diffinguish'd by the Name and Title of boneft, or very boneft Fellows, who have very little befides their Shape and Rifibility (or Faculty of laughing, which fome Philosophers make to be the formal Difference betwixt rational and irrational Animals) to diftinguish them from Brutes, we should be almost tempted to think them of a different Species: but were we to compare the Understandings, the Tempers, the Abilities of fome Men and fome Brutes. we shall find to little Difference, that it would be hard to fay to which we should give the preference. The Brute in the Stye, the Stable or the Kennel, and the Brute in the Parlour, are very often diffinguished to the advantage of the former, as the more harmless, the more ufeful, the more virtuous Animals of the two. Nor has the Difference in point of Understanding been much less considerable. Now as the Rule of Analogy makes it more than probable, that in the afcending part of the Scale there are numberless Ranks and Orders of intelligent Beings, excelling us in feveral degrees of Perfection, ascending upwards towards the infinite Perfection of the Creator, by gentle Steps and Differences, that are hardly at a difcernable diftance from each other: fo in the defcending Part, there are doubtless numberlefs

berlofs Ranks and Orders of Being endued with lower Faculties, lower Degrees of Life and Perception, till you come down by imperceptible degrees to the Vegetables, and inanimate Brute-Matter; but what are the specifick Differences that diffinguish these foveral Ranks and Degrees of Being, is not easy to conceive. The Scale of Life, like the Continuation of all Motion, the Undulation of Waves, the Vibration of Sounds, and the Progression of Light, are performed by certain infeparable, tho' diffinct and decreasing Communications and Impressions from one part of Matter to another, each of them proportionably diminishing, till you come at last to a State of abfolute Inaction and Reft: but what is the precife and abfolute Boundary, betwixt languid Motion, and absolute Reft, what created Understanding can explain or comprehend? Who can fix the direct Point where the laft dying Sound expires in dead Silence? Who can difern where the last glimmering Ray of Light is swallowed up in total Darkness and Obscurity? Who can determine the Limits betwixt the Ebb and Flowing of the Tide, or describe the single Point which is the ending of the one, and the beginning of the other ? Nor are the Boundaries betwixt the Human and Brute Understanding more eafily diftinguished. Who can determine the lowest Degree of human Ignorance, and the highest Pitch of brutal Knowledge, who can fay where the one ends, and the other begins, or K whe-

Digitized by Google

whether there be any other Difference betwixt them but in degree.

Mr. Locke in his '27th Chapter, of Identity and Diverfity, has, in the Course of his Argument, dropt something fo much to our prefent Purpofe, and fo apparently contradictory to what he has advanced in other parts of his Theory, that I cannot help transcribing it. Page 284. Edit. 8vo. I think I may be confident, that whoever should see a Creature of his oron Shape, tho' it had no more Reason, as to its Life, than a Cat, or a Parrot, would call him still a Man; or whosever should hear a Cat or a Parrot discourse, reason, and philofophize, would call or think it nothing but a Cat or a Parrot; and fay, the one was a dull, irrational Man, and the other a very intelligent rational Parrot. A Relation we have in an Author of great Note (meaning Sir William Temple's Memoirs) I had a mind to know from Prince Maurice's own Mouth the Account of a common but much credited Story, that I had beard so often from many others, of an old Parrot he had in Brasil, during his Government there, that spoke, and asked, and answered common Queftions like a reasonable Creature; so that those of his Train there generally concluded it to be Witchery or Possession; and one of his Chaptains who lived long afterwards in Holland, would never from that time endure a Parrot, but faid they all had a Devil in them. I had beard many Particulars of this Story, and affevered by People hard to be difcredited; subich made • . .

made me ask Prince Maurice what there was in it. He faid, with bis ufual Plainnefs and Drynefs of Talk, that there was something true, but a great deal falfe of what had been reported. I defired to know of him what there was of the first? He told me short and coldly, that he had beard of fuch an old Parrot, when he came to Brafil; and the' he believed nothing of it, and 'twas a good way off, he had the Curiofity to fend for it; that it was a very great and a very old one; and when it came first into the Room where the Prince was with a great many Dutchmen about him, it faid prefently, What a Company of White-men are here! They asked it what he thought that Man was, pointing at the Prince? It answered, Some General or other. When they brought it close to him he asked it, + D'ou venez vous? It answered, de Marinnan. The Prince ; A qui eftes vous? The Parrot, A un Portuguese. The Prince, Qui fais tu la? The Parrot, Je garde les Poules. The Prince laughed and faid, Vous gardes les Poules ? The Parrot anstwered, Ouy, Moy, et je sçay bien faire, and made the Chuck four or five times that People ufe to make to Chickens when they call them. I fet down the Words of this worthy Dialogue in French just as Prince Maurice faid them to me. I ask'd him in what Language the Parrot (pake? And he said in Brasilian. I asked him K 2 -11 whe-

+ Whence come you? From Marinnan. Prince. To whom do you belong? The Parrot. To a Portuguese. Prince. What do you do there? Parrot. I look after the Chickens. Prince. You look after the Chicken? Parrot. Yes, I know how to do it wery well.

Digitized by Google

whether he understood Brafilian? He faid, No, but he had taken care to have two Interpreters by him; the one a Dutchman who spoke Brafilian, and the other a Brafilian that spake Dutch; that he ask'd them separately and privately, and both of them agreed in telling him just the fame thing that the Parrot said. I could not but tell this odd Story, because it is so much out of the way, and from the first hand, and what may pass for a good one; for I dare say, the Prince at least believed himself in all be told, me, having ever passed for a very honest and pious Man. I leave it to Naturalists to reason, and to other Men to believe as they please upon it.

The Use Mr. Locke makes of this surprizing Story, is of a very particular Nature, and I must needs fay, not without Violence applied to his purpose. Hear his own Remark. The Prince, 'tis plain, who vouches this Story, and our Anthor who relates it from him, both of them call this Talker a Parrot; and I ask any one else, who thinks fuch a Story fit to be told: whether if this Parrot, and all of its kind, had always talked, as we have a Prince's Word for it, this one did; whether, I fay, they would not have paffed for a Race of rational Animals? So far, the Question is properly stated, and may be eafily answered. Without doubt they would. But, he proceeds to afk further, Whether for all that they would have been allowed to be Men, and not Parrots? Why fo? Unlefs it were thought abfurd or impious to ascribe any kind or degree of Reafon fon to Brutes; which is fo far from being the cafe, that I humbly conceive, there is at least a ftrong Probability of the contrary. And this Story, fo well attested, is no contemptible Evidence in our favour. Supposing, therefore, this to be the cafe, the Question I would after Does not this Parrot discover fhould be this: as evident Tokens at least of Reason and Understanding as many of our own Species, who are allowed to be reafonable Creatures, and to make a tolerable Appearance in the gayWorld? Is there any difcernible Difference betwixt the Conversation of this Bird, and many a fad unlucky Bird, who fancies himfelf a very pretty Fellow, and, perhaps, a very fine Gentleman? Let us, if you please, Madam, enter a little further into the Comparison. The Parrot, in fo fhort a Conversation, could discover but few Ideas, neceffarily involved in the Queffions he was obliged to answer; but those few seem to be clear, diffinct, and regularly adjusted; and if we may be allowed to judge by this Specimen, he might have a larger and better Stock of intellectual Materials to employ upon pro-First of all, It is plain, he per Occafions. could diffinguish Colours, and the Difference betwixt his footy Countrymen, and the white Attendants of the Prince. Secondly, He could diffinguish Men from any other Species of Animals, by his calling the Prince's Attendants Thirdly, He had Geography White-men. enough to diffinguish one Place from another, and to tell the Prince, that he came from Marinnan.

rinnan. Fourtbly, He understood the abstracted Nature of Property, and the relation he bore to the Portuguele Owner or Master to whom he belonged. Fiftbly, He could infer that that Relation implied fome fort of Service to be performed on his part, which was the Care of the Chicken. Sixtbly, He difcovered that he understood the Nature of his Office, and how to execute it in a proper manner, by making the Signals which the Mother used to make to her young Family, to warn them to fly from any imminent Danger, and put themselves under her Protection. It seems to appear from hence, that this fenfible, honeft, faithful Servant had as much Knowledge as was fufficient to qualify him for the Post that was affigned him, of which he gave full Proof in his Examination by the Prince. You will ell me, perhaps, this was no Proof of his Understanding; it might probably be a Leffon which he had learn'd by Rote: But, pray, Madam, is not the Probability as ftrong on the other fide ? especially as you find, that the first Speech was the effect of immediate Reflection without any leading Question to introduce it, and the reft were a Sequel of proper Answers to the several Questions that were proposed by the Prince. But you may further reply, that as he had fo few Ideas to work with, it would require a very moderate degree of Understanding, to be able to adjust them properly, and apply them justly upon proper Occasions. True-But the being able

- . . inter

able to do it at all, even in the lowest degree, is confeffing the Point that I am labouring to prove, and answers every Objection that has been made against it.-----Well, then, fuppofing this poor individual Bird at the head of his Species, compounding and comparing Ideas, forming Conclusions, reasoning, and answering Questions, we may, according to Mr. Locke's own Concession, allow him to be a Rational Parrot; and may reasonably infer that the other Individuals of the fame Species, are capable of fimilar, if not equal Improvements, and by confequence have a proportionable Title to the Character of rational Creatures: On the other hand, if a flender Stock of Ideas, a Slowness of Apprehension, a Poverty of Genius, and Narrowneis of Understanding, be a sufficient Reason for striking them out of the Rank of rational Beings, I quite dread the Confequence, and almost tremble to think what terrible Havock it must make in the human Species. How many honeft, merry, pretty Fellows must instantly refign their Pretensions to Humanity, be turned to Grass, or degraded into the lowest Rank of Vegetables! Could you steal into poor Sylvio's Pericranium, and there deface the Ideas of his Dogs, his Horses, his Bottle, and (I am forry to add) his Mistress, you would leave an. absolute Void, an entire Blank as could be found Ned Courtly, who vain the whole Creation. lues himfelf to much upon his Knowledge of the World, is not one jot richer than he; the whole . . . 5

whole Furniture of his Memory, (the only Faculty he has to find Employment for his Tongue) was stolen from the Drawing-Room, the Opera, and the Affembly; and if it were poffible for him to return his intellectual Trumpery to the place from whence he stole it, he would immediately be upon the Level with the Wafps and Butterflies. I have at this time in my eye a Group of folemn Blockheads, who have the Vanity to call themfelves Freethinkers. without being able to explain the Character they infolently claim, nor the Title by which they pretend to claim it. I with I had a properAuthority to confine them all together in one Room, with a decent Allowance of Pen, Ink, and Paper, debarring them the use of two or three Libertine Books, two or three Cantwords, and two or three Common-place Jokes, upon Parsons, Priest-craft, and Superstition, and I would defy their united Mifunderstands ings in fix Weeks time to produce fix Quarto Pages upon any Question in Philosophy or Religion, written (I do not fay with Argument or Grammar, for that would be an unreasonable Imposition) but even with true Spelling and common Senfe. Could you by any means restrain the arch, the witty, the eloquent Clarinda from her favourite Topicks of Drefs and Scandal, you would infinitely oblige all her Acquaintance, by condemning her to perpetial Silence. 13 **B**E ٠.,

Now, I would venture to fay, that the Partition betwixt the lowest Degree of Human, and (73)

and the highest Degree of Brute-Understanding, is fo wery flender, that it is hardly perceptible, and could not in any degree be diftinguish'd but by a greater Fluency of Language; which, tho' in the main it may be confidered as an Advantage to our Species in general, yet is it none to those who feldom make any other Ufermade of it, than to discover the Emptiness of their Heads, the Peverseness of their Wills, or the Iniquity of their Hearts, and shew how little the real Difference is (Shape only excepted) betwixt a fagacious, good-natur'd, governable, useful Animal, which we agree to call a Brute; and a wrong-headed, vicious, ungovernable, mischievous Brute, whom we agree to call a Man; and what Authority we have to ftrike out of the System of Immortality fo great a part of the Creation, without an absolute and evident Necessity, exceeds my Comprehension. If both Reason and Revelation affure us, that in their first Creation they were all very good : as perfect in their feveral Kinds, as beautiful in their feveral Orders, as necessary to the universal Harmony, as infinite. Power and Wildom could make them; if by the special Benediction of their Maker they were to increase and multiply, and perperuate their feveral Species, before Sin and Death entered into the World; how dare we pretend to reverse this Bleffing, to correct infinite Wildom, to alter the eftablish'd Order of Things, and pronounce a Sentence of atter Extinction upon numberless Ranks and ' Orders I.

Orders of Beings, created by infinite Wildom, to manifest the Power and Goudness of their Maker, by ministring to the Pleasure and Neceffities of Mankind, and contributing in their proper Order to the Beauty and Harmony of the universal System; Is not this pronouncing a Curfe where God has pronounced a Bleffing ? and in effect declaring that infinite Wifdom and Power were idly employed in forming, supporting, feeding, and bleffing numberless Species, Tribes, and Families of useless and unnecessary Beings? Is it not more reasonable, more confistent with the Nature of God, and the Scripture-Account of the Creation, to suppose that the immaterial Forms, the incorruptible Effences of the whole System; notwithstanding its present ruinous and deplorable Appearance under the Bondage of Corruption and Death, are immoveably fix'd in their proper Rank and Order in the invifible World, according to the eternal Archetypal Model in the Divine Mind, in and by which, as their efficient and exemplary Caule, every Being in Heaven and Earth, from the most exalted Scraph to the lowest Vegetable, was made, in which they now fubfift, and fhall for ever fubfift, in a glorious Immortality?

The Abfurdities that flow from the contrary Opinion, are a ftrong prefumptive Proof in favour of ours. That all Creatures were the Productions of infinite Goodnefs, Wirdom, and Power, and could therefore be only created in order to be as perfectly happy as their Rank and

and State in Nature could admit; is as certain as that an infinitely wife, and good, and powerful Being, could not poffibly make any Creature only with an Intention to make them miserable; and yet we fee at present the whole Face of Nature covered, as it were, with Darknefs, Confusion, and Deformity, a Scene of Sin and Folly, of Mifery and Sorrow, finking, as it were, under its own Weight, and groaning under the Bondage of Corruption: And dare we fay, or imagine, that this was the original primitive State of things? Could Diforder and Confusion, Vanity and Misery, proceed from the omnipotent Fountain of Order, Truth, and Love? Must we not rather fay, that we are in a præternatural State, that the Evils we fuffer are accidental, the fatal Confequence of the Transgreffion of our first Parents, feduced by the Temptation of an evil Spirit, to a Violation of all the Laws of Juffice, Truth, and Order? And can we imagine that this violent, this unnatural State shall laft for ever? Is the State of the whole Creation fo deplorably miferable, as to admit of no Remedy, no Hope of Deliverance? Shall the eternal Purposes of infinite Wildom, Love, and Power be intirely defeated by the Malice of evil Spirits, and the Infirmities of frail Creatures? Is not this imputing too much to the Creature, and derogating from the infinite Wildom, Goodnels, and Power of the Creator? Is not this faying in effect, that the Almight<sub>v</sub> Creator, the Father of Mercies, and the God L 2

of

of all Compatitions, whole Mercies are over all his Works, is either unwilling, or unable, to effect the eternal Purposes of his infinite Love? that the Devil is more powerful to deftroy, than God to fave ? And after all, what difficulty is there in comprehending, or what poffible Danger in afferting, that all the inferiour Creation, that fell with and in our first Parent, and suffer for our Transgression, shall at last be reftored to their primitive Happiness, and be delivered from their present Bondage of Corruption into the glorious Liberty of the Sons of .God? And why (as St. Paul fays to King Agrippa, Acts xxvi. 8.) should it be thought a thing incredible, that God should do this, efpecially as Reafon and Nature pronounce fuch a Renovation, not only possible but probable, and Revelation declares it to be certain? As for the wondrous Works of the Lord (faith the wife Son of Sirach, xviii. 6.) there may nothing be taken from them, neither may any thing be put unto them, neither can the ground of them be found out. Nothing can be added to their original Perfection, nor shall any thing be able to deftroy it, neither can any human Underfanding comprehend their effential Ground and Root in the Archetypal World, in which (notwithstanding any Violence or accidental Diforder in their prefent external Form) they stand immoveably fix'd in their proper Rank and Order, in and through which they shall in God's due time be reftored to the Splendor and Dignity of their first Creation.

And

And this, Madam, opens to us a new Scene of Wonder and Love, worthy the most ferious Attention of a rational and religious Mind. That there shall be an universal Restitution of all that fell by Adam's Tranfgreffion; when all that was loft in the first Adam shall be renewed in the fecond : that there shall be new Heavens and a new Earth, which shall be the Habitation of Righteousness. God has plainly and abundantly promifed by the Mouth of all his boly Prophets fince the World began, Acts iii. 19. 20, 21. If. lxv. 17. lxvi. 22. 2 Pet. iii. 12. I Cor. xv. 21, 22. Rev. xxi. I. And if the whole material World shall be reftored to its primitive Perfection; if there shall be a Renovation of the face of the Earth. Plal. civ. 30. there must be of consequence a Renovation of all its feminal Powers, of all the various Productions of Fruits, Flowers, Animals, and all the different Inhabitants of the feveral Regions of Nature. All the Difcord of Elements, all the Malignity of the Creatures shall intirely cease and be done away. All Nature shall put off the Corruption, Deformity, Darkness, and Confusion of their prefent State, and be reftored to the Purity, Splendor, and Beauty of their first Creation. I fuppose you will reply, and fay, as many eminent Writers have done before you, that all those Paffages of Scripture which speak of an intire Renovation and Restitution of all things, of new Heavens and a new Earth, are not to be underfood literally, that they are only metaphorical

cal Expressions to represent the mighty Change that was to be introduced into the moral World by the preaching of the Gofpel; that the prophetick Style, and Oriental Languages abounded with bold Metaphors, which could not poffibly be underftood in a literal Senfe, as when not only Birds and Beafts, but even the vegetable and inanimate Parts of the Creation are called upon to blefs and praise their Maker, and to rejoice in his Mercy, of which we have many Inftances in the Book of P/alms, and the Prophecies of the Old Testament. Thus particularly, P/. cxlvi. we find Mountains and all Hills, fruitful Trees, and all Cedars, Beafts, and all Cattle, Worms, and feather'd Fowls, are called upon to join with the grand Chorus of Men and Angels, of all the Powers of Heaven and Earth, in the Praises of their Almighty Creator. And Ef. lv. 12. The Mountains and the Hills shall break forth before you into finging, and all the Trees of the Field shall clap their Hands. So P/. civ. 21. The young Lions roaring after their Prey, are represented in the form of Supplicants feeking their Meat from God. So again, P/. cxlvii. 9. the Cry of the young Ravens is reprefented as calling upon God for their daily Bread, He feedeth the young Ravens that call upon him. That these Expressions are properly metaphorical, is eafily granted; but that they are justly and properly founded in the real Nature of things, cannot be denied, or may be eafily proved.----Let it be granted, that all those pompous Ideas, and magnificent 4

cent Descriptions which the Scriptures give us of the Redemption of the World, and Renovation of Nature, have a primary and immediateRegard to the human Nature, which cannot be denied; yet that it does not, and cannot terminate there fo as to exclude the other parts of the Creation, is, from the Analogy of Reafon, equally certain. When we confider that the whole System of Nature were Partakers of the original Happiness, were included in the universal Benediction, that every part of the animal and vegetable World, according to their feveral Capacities, received through our first Parent such divine Communications of Life and Light, and Glory, as were neceffary to compleat their Happiness, which intirely depended upon his unfinning Obedience; that by his Tranfgreffion he forfeited for them as well as for himfelf the Favour of his Maker, and the original Happiness of their State and Condition, from which they fell into their prefent lamentable State of Mortality and Corruption, it is natural to conceive, that as the whole animal Creation fympathizes and fuffers with their finful unhappy Lord and Master; fo they shall with him, in due time, recover their lost Happiness, and return to their primitive Perfection; that the Redemption and Glorification of one, must necessarily be the Redemption and Glorification of the other; that as they, as well as we, fell in and by the Transgression of the first Adam, so they, as well as we, shall be restored by the meritorious Obedience

dience and powerful Interceffion of the fecond. which the Royal Pfalmift plainly declares, P/. xxxvi. 6. Thou, Lord, shalt fave both Man and Beaft. And by parity of Reason we may conclude, that the vegetable, as well as animal Creation, shall have their proportionable Degrees of the fame Bleffing, and be Partakers of the fame Glory; fo that all the original Bleffings implanted in the vegetable World at the first Creation, shall be restored again : When all the Fruits and Flowers of Paradife, which were created to administer Nourishment and Pleafure to the Paradifiacal Bodies of our unfallen happy Parents, shall recover their original Tincture, Life, and Spirit, to be the fpiritual Food and Nourishment of the renewed human Nature. This our bleffed Lord plainly tells us, Mat. xxvi. 29. when at the Celebration of his last Supper, he affures his Disciples, that he would thenceforth drink no more of the Fruit of the Vine, until that Day when he (hould drink it new with them in his Father's Kingdom.

The Certainty of this grand Event, the Reflitution of this whole visible World to its original Perfection, is plainly and fully attested by St. Paul, Rom.viii. 19, 20, 21, 22. The earness Expectation of the Creature waitesth for the Manifestation of the Sons of God. For the Creature was made subject to Vanity, not willingly, but by reason of him who bath subjected the same in Hope; because the Creature itself also shall be delivered from the Bondage of Corruption, into the

the glorious Liberty of the Sons of God; for we know that the whole Creation groaneth and travaileth in pain together, until now. The great Point on which the true Interpretation of this Pailage depends, is to find out the true Meaning of the word Creature, in what Senfe the Apostle uses it in this place. Most of our modern Commentators have gone violently out of the way in queft of any Meaning but the true one. The pious and learned Dr. Hammond understands by it the Gentile World, in opposition to the Jews, whom he supposes to be meant by the Sons of God, and by this false Key has entangled and perplex'd, inflead of opening and explaining this glorious Prophecy. The late learned Dr. Whithy justly cenfures this Interpretation, and has advanced another equally abfurd and contradictory. He understands by it the whole Race of Mankind, but feems himfelf to be fenfible he was in the wrong, by fhuffling over feveral Expreffions, which, if duly confider'd, would have shewn him his Mistake, and led him into a more confiftent Scheme of Interpreta-However, after he had fufficiently tion. puzzled himfelf and his Readers with aiming at fomething like a Meaning, he attempts to give you from Quotations out of two of the . primitive Fathers, what he calls the ancient and almost primitive Exposition of these Words. After which, he modestly subjoins his own Judgment : I differ only from the Fathers in this Interpretation

terpretation as to this fingle Circumstance, that I do not extend this Defire of the Redemption of the Body from Corruption to brute Beafts, and insensate Creatures, but only to Mankind in general subject by Adam's Fall to Mortality: p. 45. Now I must needs fay, it would have been but modeft and reasonable in the Doctor, after having entered his Protest, to have given us his Reasons for differing from this almost primitive Exposition. And I believe it would be very hard to produce any Reason against their future Reftoration, which would not conclude as ftrongly against their first Creation. If infinite Wildom and Goodnels faw fit to produce fuch numberlefs Ranks and Orders of Creatures, to compleat the Harmony of the univerfal Syftem, and to fhare with Man in the Bleffings and Glories of Paradife, before Sin and Death entered into the World; is it not highly reafonable to imagine, that they are preferved by the fame infinite Wildom and Goodness to be Sharers in the Happiness and Glory of the new World, when Sin and Sorrow shall cease, when Corruption and Mortality shall be no more, and Death it felf shall be (wallowed up in Victory?

There is one Expression in ver. 22. which feems plainly to determine what we are to understand by the Creature, and may be justly confidered as an infallible Key to the Aposters whole Meaning; and that is, that the whole Creation groaneth and travaileth in pain together

together till now. Now, it is plain, at first fight, that the whole Creation, which groaneth and travaileth in pain, is that very Creature that waiteth for the Manifestation of the Sons of God; that very Creature that [hall be delivered from the Bondage of Corruption into the glorious Liberty of the Sons of God. Whatever part of the Creation, therefore, fuffers under any shape or degree of Imperfection, Milery, Corruption, and Mortality, may be justly confidered as groaning and travailing in pain, and by confequence as Candidates for Redemption and Immortality. Now, as it is plain, that no one part of the Creation is exempted from the Bondage of Corruption ; fo it feems equally plain, that no one part shall be excluded from the Universal Deliverance, and that the Redemption from the Curfe, must be as univerfal as the Curfe itfelf; fo that whatever fuffers by the Fall, fiall be reftored at last into the glorious Liberty of the Sons of God. And this may help us to an cafy Explanation of an Expression, that cannot otherwise be eafily reconciled to the ordinary Forms of Speech. The Paffage is Mark xvi. 15. where the Apostles are commanded to preach the Gospel to every Creature; from whence fome of the Legendary Writers of the Church of Rome have juftified the Preachments of their Saints to the Birds, Beafts, and Fishes, and thereby given the Precept a ridiculous Turn, and furnished occasion of Mirth and Derision to Infidels and Fools: M 2

Fools: But in this View it appears capable of a plain and natural Meaning. Go ye forth into all the World, and preach a joyful Meffage of Redemption to the whole Creation. And I must needs fay, it has often puzzled me to think, why the fame Expression in the Original flould be thus differently rendered in English, fo as to be called every Creature in one place, and the whole Creation in another; which, tho' really and truly the fame thing, yet have a quite different manner of Appearance in the different manner of Expression, but on my Principles eafily reconciled.-Accordingly I shall endeavour to give you a plain and natural Paraphrase of this famous Passage in the Epistle to the Romans, ch. viii. ver. 19, 20, 21, 22. without troubling you with critical Remarks upon the Original, or Authorities from the Ancients, both which concur to establish the Truth for which I am contending .---- " The Struggles and Dif-" treffes of every part of the vifible Creation " are firong Indications of a universal Dege-" neracy and Curfe, from which they feem " to labour and figh for Deliverance, and " which they shall certainly obtain at the glo-" rious Appearance of their great Redeemer, " who shall come in the Glory of his Father, " and of his holy Angels, and all his Saints " with him, to triumph over Sin and Death, " to repair the Ruins of fallen Nature, and " eftablish the Kingdom of God upon this " very

" very Earth, in which his Will shall be done " as it is in Heaven. For the Vanity and " Mifery under which they now groan, was " not the effect of any voluntary Guilt or " Transgreffion of their own, but was brought " upon them by the Transgression of our " first Parents, but under a sure and certain " Hope of Redemption, by the all-fufficient " Merits and Interceffion of our Lord Jefus " Chrift, who is their Sayiour as well as ours; " when he shall have accomplished the Num-" ber of his Elect, and begun to establish his "Kingdom: Then shall the whole visible " Creation that fell under the Curfe by the Sin " of Man, be reftored with the human Na-" ture, and with and through him be Parta-" kers of the Bleffings and Glories of the "Kingdom of God. At prefent we fee the " whole Creation fubject to Vanity and Death, " from which, like a Woman in Travail, it " labours to be delivered, but has not Strength " to bring forth, nor can hope for Deliverance " till that happy Day when the great Redeem-" er shall restore whatever has been decayed, " shall create new Heavens and a new Earth, " where Sin and Death can have no place, " where Evil cannot enter, but God shall be " All-in-All," Alla : Do

That the Brute-Creation are particularly interested in this great Event, is plainly and fully attested by many remarkable Prophecies of the Old Testament. Thus, Ef. xi, 6, 7, 8, 9.

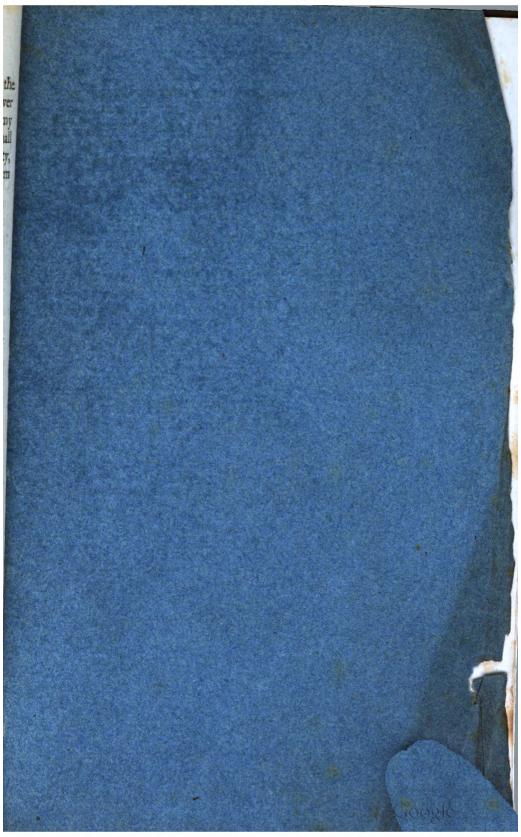

8, 9. speaking of the peaceful and glorious Reign of the Mefliah, illustrates it in a particular manner, by the Harmony that shall be reftored thro' the whole animal Creation. The Wolf allo (ball dwell with the Lamb, and the Leopard (hall lie down with the Kid, and the Call and the young Lion and the Fatling together. and a little Child shall lead them. And the Cow and the Bear shall feed, their Young-ones shall lie down together, and the Lion fall eat firaw tike the Ox. And the fucking Child shall play on the Hole of the Afp, and the weaned Child shall put his Hand on the Cockatrice Den: They **(hall not burt nor destroy in all my boly Mountain:** for the Earth shall be full of the Knowledge of the Lord; as the Waters cover the Sea. So again, Ch. 1xv. 25. The Wolf and the Lamb Shall feed together, and the Lion shall eat Straw like the Bullock, and Dust shall be the Serpent's Meat; they shall not burt nor destroy in all my holy Mountain, faith the Lord. The Prophet Hofea foretels the fame thing, Ch. ii. 18. In that day will I make a Covenant for them with the Beafts of the Field, and with the Fowls of Heaeven, and with the Greeping Things of the Ground, who fhall lofe their Malignity, which was employed to fcourge, and punish their rebellious Lord ; all the Enmity of the Creatures shall ceafe; the divided Properties, the difcordant Motions of the Elements shall be intirely swallowed up in univerfal Harmony, Peace, and Love. And the Glory of the Lord shall endure for

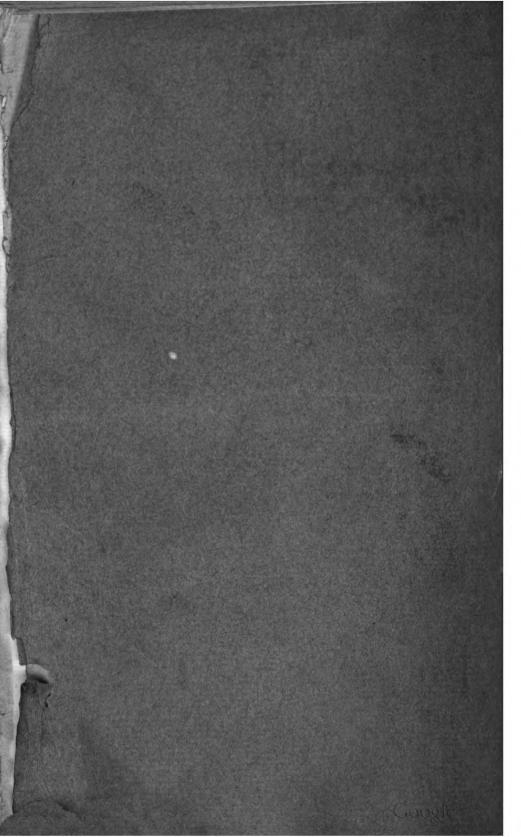

for ever: the Lord shall rejoice in his Works. Pf. civ. 31.

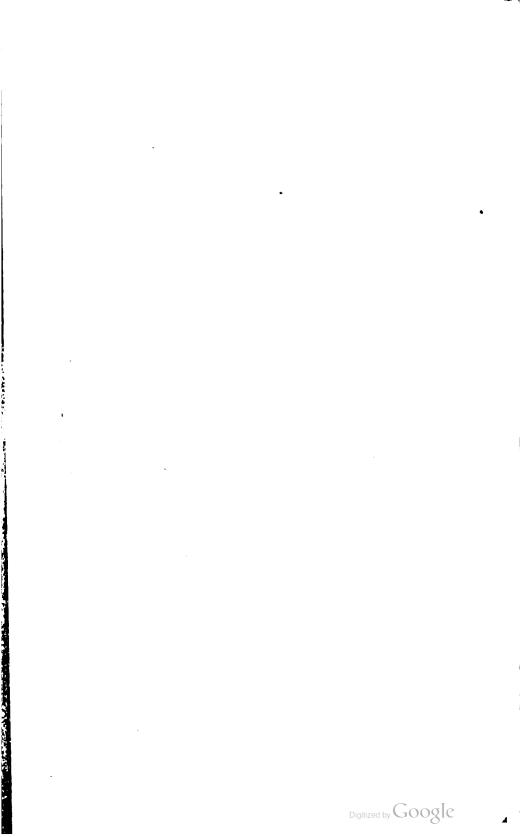

Pardon me, Madam: The Nature of my Subject has infenfibly drawn me into a greater Length, more ferious Enquiries, and graver Conclusions, than I at first intended; for which an indifferent Reader would expect an Apology, and which, to any body but yourfelf, I fhould think myself obliged to offer: But your inquisitive Genius, your rational Head, and benevolent Heart, I truft; will eafily excufe, if you cannot intirely approve a wellmeant Attempt to vindicate the Wifdom of Providence in the Works of the Creation, and rescue so great a part of God's Creatures from the rude Cenfures of weak and ignorant Pretenders to Philosophy. If I have, in any degree, done justice to my Subject, if I have given you any Light and Satisfaction in this momentous Queftion, your Approbation will give me a Pleasure equal to the Regard I have for your Perfon, and the Efteem I have for your Judgment: But, if the worft I fear should happen, should you think I have undertaken a defenceless Cause, or betrayed it by an injudicious Management; should you even tell me, I have miltaken the State of the Question, or offered any thing weak or inconclusive in defence of it, even there I should humbly hope for your Indulgence, that the Honefty of my Heart may atone for the Weakness of my Head : Head; the Goodness of my Intention, for the Defects of my Understanding: for whatever Cause I may have given you to condemn my Sentiments, or despise my Judgment, I shall never give you any to suspect my Sincerity, when I profess myself, with the highest Esteem and Regard,

Ripon, Nov. 24, 1742.	Your Faithful and Obedient					
	•			Humble Servant.
